

SWIM AT HOME™ ENDLESS POOLS®

All Year Round, Inside or Out

Swim in the convenience and privacy of home with Endless Pools, the worldwide leader in swim-in-place technology.

The Original Endless Pool features:

- **The Best Swim Current:** Fully adjustable, from toddlers to triathletes, our propeller-driven current remains smooth, even at its 1:14/100m top pace.
- **Modular Construction:** Steel-panel, vinyl-liner design allows installation indoors or outside, even in existing rooms, basements, and corners!
- **Low-Chlorine Water Purification:** Water stays clear with no pool odor.
- **Temperature Control:** The compact body of water makes it economical to heat (and use) year-round.

With 20,000+ customers in 100+ countries, Endless Pools is trusted worldwide as the premiere manufacturer of swim-in-place pools.

Add Endless Pools to your product line to increase your store traffic and boost your bottom line. Learn more about becoming an authorized Endless Pools dealer today.

Specifications:

- Size: 2.13m x 3.66m to 3.05m x 4.88m swimming area
- Power Requirement: 220v, 32-amp, RCD
- Volume: 8,000 to 19,000 liters
- Options: upgraded current, underwater treadmill, coping, skirting, security covers, child alarm, swim mirrors, access options, exercise options, lights, hydrotherapy jets, more
- Included: customizable steel-panel pool with vinyl liner, 5-hp swim current system, 4-kW heater, water quality system, high-efficiency circulating pump, skimmer filter, digital systems control

Our Pool Series offers unrivaled design and installation flexibility. The modular free-standing pools include a swim current generator with acrylic water return channels (Sapphire or Platinum), water quality system (skimmer/filter, copper/silver pool water purifier, electric heater/controller and circulating pump), floating solar cover, durable liner membrane, and aqua aerobics exercise bar.

Original Endless Pool®... our single-propeller, 5-hp system stands head and shoulders above any other swim current on the market. It's wider than your body, deeper than your stroke, and easily adjusts from a gentle flow to a vigorous 1:14/100m pace.

Performance Endless Pool®... offers a faster, smoother swim current. The custom-designed system uses 2 propellers to create a more efficient current that is wider and deeper than our standard swim system and produces a top speed of 1:11/100m pace.

High-Performance Endless Pool®... maxes out at a competitive 1:00/100m pace. With its 7.5-hp motor and upgraded pump (both standard), this model is both quieter and more powerful. It's the pool of choice for triathletes and other serious swimmers.

- 1 Acrylic water propulsion system with 16" propeller produces broad, deep, ultra-smooth current
- 2 Poolside controls adjust heat and operate optional jets and lights
- 3 Textured acrylic return channels serve as perimeter seating (42" pools) as well as return system for water flow
- 4 Wireless remote controls the swim current's 52 preprogrammed speeds
- 5 Optional skirting
- 6 Optional digital swim pace display with 7" high-visibility, LED screen allows you to see your swim pace
- 7 Optional manual or automatic retractable security covers lock in heat and lock out dirt and debris
- 8 Computerized water quality system mounted on the front panel
