

INTRODUCING

i-Ready® Fluency Flight

Grades

2-5

Math Facts Fluency Program

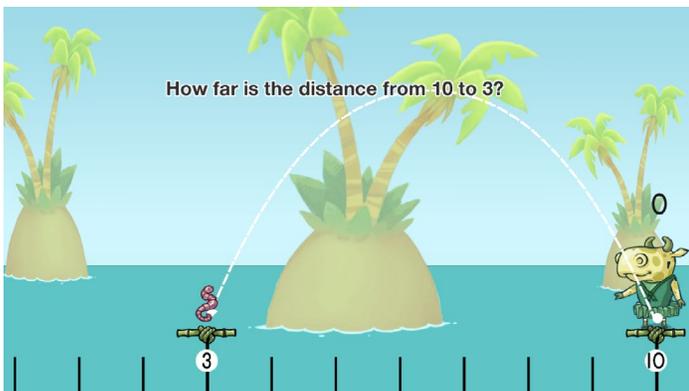

Addition and
Subtraction Facts
within 20

Multiplication and
Division Facts with
Operands to 12

Fluency Flight combines the latest research on learning, neuroscience, and psychology with the best practices in digital games. The results from this combination? Confident students who know their math facts and have flexible strategies to tackle new and more difficult problems.

With Fluency Flight, students understand their math facts—not just memorize them. By following the game-based approach four days a week, roughly eight to 10 minutes a day, students move through four stages of fluency for unique sets of math facts. As students make progress, the games and feedback adjust to maximize the learning at each stage.

Four Stages of Fluency Development

1 Basic Understanding: Visuals, stories, and strategies to make sense of operations and facts

2 Accuracy: Practice until facts are answered accurately

3 Automaticity: Continued practice until facts are answered accurately and efficiently

4 Maintenance: Retain automaticity of facts

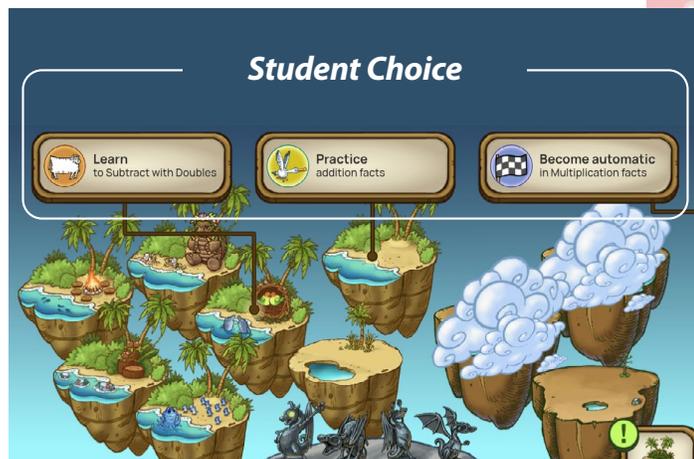

Automaticity and Understanding without Anxiety

Help your students master math facts without anxiety. Fluency Flight helps students achieve math fact fluency using an engaging, research-based design. By delivering the right content at the right time, Fluency Flight solidifies students' conceptual understanding and long-term memory formation. Digital games make practice fun and reward students for their effort and persistence.

Build Speed and Confidence

Speed is encouraged through positive reinforcement and is introduced only when students have demonstrated accuracy and are ready to work on automaticity.

When You Know More, You Can Do More

Personalized recommendations and opportunities for choice engage students and help them monitor their progress.

Student	Addition (+)			Subtraction (-)			Multiplication (x)			Division (÷)		
Anderson, Lily	28%	62%	10%	8%	35%	57%	8%	35%	57%	4%	15%	81%
Baliley, Lauren	20%	55%	25%	20%	55%	25%	20%	55%	25%	60%	40%	
Bell, Deldre												

Educator reports provide insight into student usage and performance to support students in achieving short- and long-term goals and making lasting, meaningful growth.
