Grass and Hay

On the ranch, we have grass that will be **food** for the
12 stock. The grass is not sprayed with water because the
22 grass gets water from rain. In May, if we have 3 days with
35 sun and no rain, we cut the grass. When we cut the grass,
48 we lay it on the land until it wilts. Then the grass is hay.
62 Next, we put the hay into bunches and stack them. The
73 bunches of hay are put in a shed. Some of the hay will be
87 food for the stock. We will sell the rest of the hay.
99 Hay crops can fail! If we wait to cut the grass, we may
112 not have hay for the stock. If it rains after we cut the
125 grass, the hay can rot. If the shed is damp, the hay may
138 rot. If insects, or bugs, get to the crop, the crop can fail.
151 Yes, we have had failed crops!
