

The Relationship between *i-Ready Diagnostic* and the 2022 Standards of Learning (SOL)

About the Students Included in the Study

Curriculum Associates conducted a large-scale study on the relationship between the *i-Ready Diagnostic* and the 2022 SOL for Grades 3–5 in Reading and Grades 3–8 in Mathematics, the primary grades in which *i-Ready* is used in Virginia for which there is a state summative assessment in place. Students came from a total of six school districts, all public and none of which were charter agencies (see Table 1). The school districts were selected for participation in the study specifically to be representative of the state in terms of factors such as urbanicity, race/ethnicity, and socioeconomic status (using National School Lunch Program as a proxy). See the [Appendix](#) for more information on the sample.

Research Overview

i-Ready Diagnostic and the 2022 SOL are highly correlated—with an average spring correlation of .80 for Reading and .83 for Mathematics.

Table 1. Demographic Information for Virginia Districts in Study

District	Schools Participating	Location	Total Enrollment	% National School Lunch Program	% English Learners ¹
1	24	Suburb (13), Rural (11)	15,000–19,999	45%	5%
2	16	Rural (12), Suburb (3), City (1)	8,500–8,999	40%	5%
3	12	Suburb (9), Rural (3)	5,500–5,999	65%	<5%
4	4	Rural (3), Town (1)	2,000–2,499	65%	5%
5	6	Rural (4), Town (2)	2,000–2,499	65%	<5%
6	3	Rural (2), Town (1)	1,000–1,499	30%	5%
Average of Participating Districts²				49%	5%
Average across All Districts in the State²				46%	9%

Note: Demographic data are available at the school and district levels and may not precisely describe the study sample. District-specific statistics are provided as ranges or rounded to the nearest five percent in order to ensure the anonymity of participating districts.

¹Data on English Learners are only available at the district level.

²Averages are weighted.

Correlation Results

Across all grades and subjects included in the study, results provide evidence for the strong correlation between *i-Ready Diagnostic* and the SOL (see [Figure 1](#)). Specifically, spring correlations for Reading ranged from .78 for Grade 5 to .81 for Grade 3, and spring correlations for Mathematics ranged from .79 for Grade 8 to .84 for Grades 4, 5, and 6. These correlations, all surpassing the .70 standard generally considered to be strong in education research, provide evidence of a substantial relationship between *i-Ready Diagnostic* and the SOL.

Figure 1. Correlations between Fall, Winter, and Spring *i-Ready Diagnostic* Scores and 2022 SOL Scores

Why Correlations Matter

Correlations are one of the most commonly used and widely accepted forms of validity evidence. Correlations demonstrate that when students score high on one assessment, they also tend to score high on the other, and similarly, when students score low on one assessment, they also tend to score low on the other. A high correlation between two assessments provides evidence that the two assessments are measuring related constructs.

Appendix

The sample included more than 20,000 students, with between 1,317 and 1,380 students per grade for Reading for the spring *i-Ready* assessment and between 2,205 and 4,077 students per grade for Mathematics for the spring *i-Ready* assessment (see Table 2). These students took both the *i-Ready Diagnostic* and the SOL during the 2021–2022 school year. For the purposes of this study, *i-Ready Diagnostic* scores were included only if the student indicated that the test was taken completely in school.

Table 2. Sample Sizes for Correlations

	Reading			Mathematics		
	Fall	Winter	Spring	Fall	Winter	Spring
Grade 3	1,223	464	1,317	3,688	2,937	3,867
Grade 4	1,279	460	1,329	3,803	3,069	3,998
Grade 5	1,278	490	1,380	3,873	3,033	4,077
Grade 6	N/A	N/A	N/A	2,236	2,386	2,420
Grade 7	N/A	N/A	N/A	2,369	2,352	2,362
Grade 8	N/A	N/A	N/A	2,167	2,274	2,205

Table 3 shows the percentage of students in each race/ethnicity group from the study samples. In both the Reading and Mathematics samples, we have strong representation from students of different racial/ethnic groups.

Table 3. Race/Ethnicity Information for Sample of Virginia Students in This Study

	American Indian or Alaska Native	Asian	Black	Hawaiian or Pacific Islander	Hispanic	Two or More Races	White
Reading	.5%	1.3%	35.0%	.2%	5.0%	6.9%	51.1%
Mathematics	1.4%	2.2%	17.6%	.5%	7.3%	7.5%	63.4%
