

i-Ready and College and Career Readiness

Now more than ever, it's critical your district's assessments and classroom instruction support Maryland's college and career readiness goals. You'll also want to ensure the program you choose supports the diverse needs of your students and teachers.

i-Ready is a single-platform mathematics and reading program for Grades K–8. **Used by more than seven million students nationwide**, *i-Ready* can help support student growth and achievement in classrooms across Maryland through its adaptive assessment tools, online Personalized Instruction, and teacher resources.

i-Ready Provides ...

Early warning for struggling students when used for screening, placement, and intervention

Both criterion-referenced and norm-referenced scores to help ensure all students have challenging, yet attainable goals

Rich, accurate data shared via intuitive reports detailing the growth students need to reach grade-level expectations and what they must do to get there

Actionable data via the Diagnostic to help teachers make informed decisions about whole class, small group, and individual instruction

Growth monitoring to measure student progress on an ongoing basis

Online lessons and practice paths for each student that are identified by the Diagnostic. Every lesson encourages productive struggle to accelerate growth by addressing learning gaps while also enabling access to grade-level learning.

A suite of support tools including Teacher Toolbox and Tools for Instruction that provide seamless access to differentiated instruction for all students

Strategic scaffolded supports that motivate students to persist in both text and task that are of particular benefit to English Learners

Strong correlations to consortia and state assessments that consistently exceed established benchmarks in education

Statistically significant gains identified by third-party and independent research studies, which meet Every Student Succeeds Act (ESSA) Level 2 evidence standards, found that students who received *i-Ready Personalized Instruction* demonstrated positive and statistically significant gains above that of their control group counterparts in both reading and mathematics on multiple measures.*

Maryland Educators Weigh In on *i-Ready*!

"I love how *i-Ready* engages my students! I think it is challenging, yet fun for them. It also helps to prepare my students for state testing."

—Teacher, Worcester County School District

"*i-Ready* has increased our students' growth in reading and mathematics tremendously. *i-Ready* is easy to use and the directions are easy to follow. It works well with all students. They love the program and ask to get on the *i-Ready* program without reminders."

**— School-Level Administrator,
Montgomery County Public Schools**

"[*i-Ready*] allows teachers to understand exactly where students are academically and makes suggestions on what to do to push their academic achievement."

**—School-Level Administrator,
Prince George's County School District**

"I have found that my students who use *i-Ready* have become more flexible math thinkers. Their number sense has improved dramatically."

—Teacher, Washington County Public Schools

"I love when I am about to teach a lesson or talk about a story and the kids already have the background knowledge from *i-Ready* and share that out with the class."

—Teacher, Baltimore City Public Schools
