100 questions that promote

Discourse Discourse

Help students work together to make sense of mathematics

- 1 What **strategy** did you use?
- 2 Do you agree?
- 3 Do you disagree?
- Would you ask the rest of the class that question?
- 5 Could you **share your method** with the class?
- What part of what he or she said do you understand?
- Would someone like to share ____?
- 8 Can you convince the rest of us that your answer makes sense?
- **9 What do others think** about what [student] said?

- Can someone **retell or restate** [student]'s explanation?
- Did you work together? In what way?
- Would anyone like to add to what was said?
- Have you **discussed** this with your group? With others?
- Did anyone get a different answer?
- **Where** would you go for help?
- Did everybody get a fair chance to talk, use the manipulatives, or be the recorder?
- How could you help another student without telling them the answer?
- How would you explain ____ to someone who missed class today?

Help students rely
more on themselves
to determine whether
something is
mathematically correct

- 19 Is this a reasonable answer?
- **20** Does that make **sense**?
- **21 Why** do you think that? Why is that true?
- 22 Can you draw a picture or make a model to show that?
- How did you reach that conclusion?
- 24 Does anyone want to **revise** his or her answer?
- **How were you sure** your answer was right?

Help students learn to reason mathematically

- How did you begin to think about this problem?
- What is **another way** you could solve this problem?
- 28 How could you **prove** _____?
- Can you explain how your answer is different from or the same as [student]'s answer?
- Let's break the problem into parts. What would the parts be?
- Can you explain this part more specifically?
- Does that always work?
- Can you think of a case where that wouldn't work?
- 34 How did you **organize** your information? Your thinking?

Help students with problem comprehension

Help students evaluate their own processes and engage in productive peer interaction

- 35 What do you need to do next?
- 36 What have you accomplished?
- 37 What are your strengths and weaknesses?
- **38** Was your **group participation appropriate and helpful?**
 - What is this problem about?
 What can you **tell me about it**?
 - Do you need to **define or set limits** for the problem?
 - 41 How would you interpret that?
 - Could you reword that in simpler terms?
 - 43 Is there something that can be eliminated or that is missing?
 - Could you explain what the problem is asking?
 - What **assumptions** do you have to make?
 - What do you **know** about this part?
 - Which words were most important? Why?

Help students learn to conjecture, invent, and solve problems

- What would happen if ____?
- Do you see a pattern?
- 50 What are some **possibilities** here?
- Where could you find the **information** you need?
- How would you **check your steps** or your answer?
- What did not work?
- How is your solution method the same as or different from [student]'s method?
- Other than retracing your steps, how can you determine if your answers are appropriate?
- How did you **organize** the information? Do you have a **record**?
- How could you solve this using tables, lists, pictures, diagrams, etc.?
- What have you tried? What **steps** did you take?
- How would it look if you used this **model** or these **materials**?

- How would you draw a diagram or make a sketch to solve the problem?
- Is there **another possible answer**? If so, explain.
- 62 Is there another way to solve the problem?
- ls there **another model** you could use to solve the problem?
- Is there anything you've overlooked?
- 65 How did you think about the problem?
- 66 What was your estimate or prediction?
- 67 How **confident** are you in your answer?
- **68 What else** would you like to know?
- 69 What do you think comes **next**?
- ls the solution **reasonable**, considering the context?
- 71 Did you have a system? Explain it.
- **72** Did you have a **strategy**? Explain it.
- 73 Did you have a **design**? Explain it.

Help students learn to connect mathematics, its ideas, and its application

- What is the **relationship** between ____ and ____?
- Have we ever solved a problem like this before?
- What uses of mathematics did you find in the **newspaper** last night?
- What is the same?
- What is different?
- Did you use skills or build on concepts that were **not necessarily mathematical**?
- Which skills or concepts did you use?
- What **ideas** have we explored before that were useful in solving this problem?
 - Help students **persevere**
 - What was **one thing you learned** (or two, or more)?
 - Did you **notice any patterns**? If so, describe them.
 - What **mathematics topics** were used in this investigation?
 - What were the **mathematical ideas** in this problem?
 - What is mathematically different about these two situations?
 - What are the variables in this problem? What stays constant?

- 82 Is there a pattern?
- **83** Where else would this strategy be useful?
- 84 How does this **relate** to ____?
- 85 Is there a general rule?
- Is there a **real-life situation** where this could be used?
- B7 How would your method work with other problems?
- What other problem does this seem to lead to?
 - 89 Have you tried making a guess?
 - **90 What else** have you tried?
 - Would **another method** work as well or better?
 - 92 Is there **another way** to draw, explain, or say that?
 - 93 Give me another **related problem**. Is there an easier problem?
 - How would you **explain** what you know right now?

Help students focus on the mathematics from activities
