

Translation Share Group

i-Ready Classroom Mathematics is a problem-based discourse-driven core curriculum for Grades K–Algebra 1. The program is designed from the ground up to stimulate thinking and help every student become a capable, confident mathematician. The *i-Ready Classroom Mathematics* Translation Share Group is a community where partnership schools can share translated files with each other to assist students needing resources in additional languages.

What resources are available in the translation share group?

- French (Grades 1–3): Session PowerPoint® slides
- Chinese (Simplified) (Grades 1–3): Session PowerPoint slides
- Portuguese (Grades 1–3): Session PowerPoint slides and Student Worktext PDFs

Student Worktexts

The Student Worktext PDFs are available in a digital format that provides access to instruction, practice, Family Letters and activities, Self-Reflection, vocabulary activities, Unit Review, Cumulative Practice, and Glossary.

Presentation Slides

To save educators time on lesson preparation, our partner districts have provided editable PowerPoint slides. Session Slides were developed to support each session from beginning to end. Teachers can project the slides onto a screen throughout the lesson to guide instruction, promote productive struggle, and encourage students to try and reflect upon a variety of strategies for solving problems. These completed slides require no additional action, but **teachers are able to download, edit, and save the Session Slides** in order to make the best instructional decisions for their students.

How to Join the Translation Share Group

Join a community where partnership schools can share translated files and resources with each other.

Step 1 Notify your *i-Ready Classroom Mathematics* educational sales consultant of your interest. **Click [here](#) to find your local educational sales consultant.**

Step 2 Your *i-Ready Classroom Mathematics* educational sales consultant will complete and submit the request for access to these shared translated files.

Step 3 Your *i-Ready Classroom Mathematics* educational sales consultant will provide your district with a formal sharing agreement and group guidelines, which will need to be reviewed and signed by someone of district authority.

Note: The district partner must identify two personnel who will act as points of contact.

Step 4 Upon signature, the points of contact will receive a nontransferable link and password, giving the district access to all shared language files for the length of the district's contract with *i-Ready Classroom Mathematics*.

Do you already have translated materials you are willing to share?
