

Human Space Exploration Redefined

Building Era-Defining Space Infrastructure

Axiom Space is a human space exploration company, building era-defining space infrastructure and delivering technology-driven solutions that will empower civilization to transcend Earth.

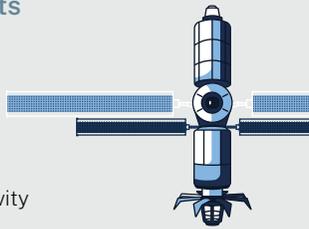

Beginning with Axiom Station, successor to the International Space Station, Axiom Space is pioneering a next-generation orbital settlement that will foster groundbreaking innovation and research in microgravity and drive the global space economy of tomorrow.

Today, guided by the vision of leading humanity's expansion off planet, Axiom Space is the principal provider of commercial human spaceflight services and developer of advanced spacesuits for the Moon and beyond.

Pioneering Human Settlements

Axiom Station is what comes next.

A next-generation platform for continuous human presence in low-Earth orbit, built to ensure uninterrupted access to the microgravity environment for critical research and operational stability.

Advancing Human Exploration

As the sole provider of spacesuits for Artemis lunar missions and low-Earth orbit operations, our innovative single-architecture provides advanced mobility and capability rooted in functionality and safety. We are uniting commercial partners to develop human systems that advance humanity's technological power.

Expanding Human Experience

Comprehensive human spaceflight missions expand access and opportunities to countries, institutions, and industries actively building and defining the next era of human space exploration.

14 ASTRONAUTS | 11 COUNTRIES | 4 MISSIONS

Igniting Human Innovation

Enabling breakthroughs begins with understanding the unique benefits provided by microgravity and then connecting innovators worldwide with the platform, capabilities, and partnerships needed to advance discovery for the future.

200+ PAYLOADS | 100+ CUSTOMERS | 2 ORBITAL COMPUTE NODES

Mission

Build era-defining space infrastructure and deliver technology-driven solutions that fuel exploration and power a vibrant space economy for the benefit of every human, everywhere

Vision

Transcend Earth
