

## Municipal Replacement Parts Availability

23-PB-CP

This bulletin is to notify you that we have phased out certain replacement parts and are offering a last purchase date on select items. It's important that we keep you updated on parts availability so that you can plan for servicing and maintaining your TrojanUV system. We are committed to helping you keep your system operating efficiently for as long as possible.

### Why are these parts being phased out?

**Off-the-shelf Parts:** We've heard from customers that these off-the-shelf parts, such as wire, switches, and tubing are readily available through local sources. This provides convenience for you and allows us to focus on the components and parts where we can provide the most value.

**Technology Advancement:** Some parts are being phased out in light of the introduction of newer UV systems and components that boast improved technology, features, and functionality. In the world of electronics especially, components advance rapidly, and older parts are gradually being discontinued by manufacturers. As a result, they become either unavailable or come at a premium while supplies last.

### Actions to Take

1. Please review the list of parts that are available for your installed system (while supplies last) for a last time buy until January 8, 2024. Contact us if you would like to stock up.
2. Please review the list of parts for your installed system that are no longer available for purchase from us effective immediately. If available, parts specifications and drawings can be provided upon request.

## † Identify your TrojanUV3000Plus System Model

Please see the summary table below to help you determine what generation of TrojanUV3000Plus system you have.

	GEN 1	GEN 2	GEN 3
Release Year	1999	2007	2022
Also Named	Standard or Pre07	2007 or '07	2022 or '22
Date of Sales Availability	1999 – 2007*	2007 - Present	2022 - Present
Lamp Type**	Light blue or yellow based	Red angled based	Integra™ Lamp Assembly (Grey base)
PDC***	Flat mounted	Angle mounted	Angle mounted

\* A limited number of systems installed during 2007 and up to 2014, may also be GEN 1.

\*\* This is the most common lamp type(s) associated with each generation; however, other variations are possible.

\*\*\* A noticeable feature of the TrojanUV3000Plus GEN 1 product is a flat-mount Power Distribution Center (PDC) while newer generations of TrojanUV3000Plus systems have an angle-mounted PDC.
