

Laptop Lock

Laptop solution with OneKEY instant access.

Purpose-Built Security

Laptop Lock combines high-strength security with a modular design that lets associates quickly remove, replace, or reposition laptops using OneKEY. Display one laptop or an entire lineup while giving customers the freedom to interact, compare, and shop with confidence.

UNIVERSAL COMPATIBILITY

Designed to work with any laptop, from compact notebooks to large gaming laptops. Allows retailers to standardize security across every display.

FAST REMERCHANDISING

Sliding bracket arms unlock instantly with OneKEY, making customer interaction, remerchandising, and nightly removal fast and simple.

ADJUSTABLE DISPLAY

Secure one or multiple laptops with a flexible design that adapts to changing products and layouts, while maximizing the number of devices you can display on a single track.

Proven Performance in Every Detail

Reliable Physical Security

Steel locking arms keep laptops securely protected while maintaining an open, interactive shopping experience.

Universal Compatibility.

Works with any laptop, allowing you to standardize security for different brands, screen sizes, and laptop thicknesses.

Designed for Quick Changes.

Using OneKEY, quickly remove, reposition, or replace laptops with no tools or adhesives to slow associates down.

Simpler Operations. Greater Control. OneKEY Ecosystem.

Manage laptop security with the same trusted OneKEY used throughout your store. Track associate interaction and manage access activity with InVue's Portal Software.

Maximize Display Space

Daisy chain multiple rails to create a flexible, interchangeable planogram. With the addition of a two-sided lock, stores can fit more laptops within the same display.
