

NE360C Removal Tool (CT3170) Usage

- 1 Use the small hex key included with the NE360C stand to loosen the 3 set screws on the mounting plate.

- 2 Lift the stand from the mounting plate.

- 3 Assemble the CT3170 removal tool. Place the tool onto the stand so that the teeth engage with the mounting plate as shown.

- 4 Using steady pressure, rotate the tool clockwise to break the adhesive bond.

- 5 Remove the mounting plate from the surface.
Note: Before reinstalling the plate, remove the old adhesives and remove any adhesive residue using an alcohol wipe before installing new adhesives.
