

RAC Lock

The RAC Lock is a rack access control lock designed to work for a data center server rack door. The system consists of a main lock body, handle, and an optional accessory sensor. The main lock body is designed to lock and unlock a server cage door. The RAC Lock is compatible with the InVue OneKEY Ecosystem (order separately). The InVue OneKEY Ecosystem is based on a uniquely coded infrared key used to transfer energy to the RAC Lock and lock/unlock the RAC Lock.

The RAC Lock also includes an optional accessory Reed switch sensor to attach to the server cage door to determine if the door is locked.
