Standard High Security-4mm Stud

AC275-W/B
Extreme High Security-6mm Stud*
*May require fixture modifications to accommodate

InVue Multi-Tool With Phillips Head Bit

AF6313

Installation Considerations

To keep in mind:

Dry Fit

In addition to checking diameter compatibility, we recommend a dry fit, as factors like band stiffness and charger size may affect the fit.

Charging Considerations

In some regions or for certain customer groups, wearable samples may be provided with or without power supplies.

While the HSW100 does not require a specific power supply, the PS520 is a 30-watt USB-C PD power brick that is compatible with many configurations. Be sure to confirm charging requirements during the discovery phase before placing an order.

- PS520-US
- PS520-JPN
- PS520-IND
- PS520-AUS
- PS520-UK
- PS520-EU
