

## Portable Payment Center

# Transform Every Space into a Place to Sell.

Flips 180° for  
Customer View

## Take Payments Where Decisions Happen

Bring checkout directly to the customer. InVue's Portable Payment Center removes the need for fixed power or wiring, allowing associates to sell faster—at tables, fitting rooms, pop-ups, or anywhere flexibility drives revenue. Battery-powered, USB-C compatible, and available with a 180° flip screen or dual displays, it delivers seamless customer-facing checkout at the point of decision.

### RUN ALL DAY. NO OUTLETS NEEDED.

Up to 11+ hours on one battery, with quick battery swaps that keep your POS running through peak hours without interruption.

### TWO-SIDED ENGAGEMENT

Flip the screen toward the customer or use secondary displays at the same time for smoother payment experiences.

### EASE OF INSTALLATION

A deploy-anywhere design that eliminates wiring and fixed installs, allowing fast setup and instant mobility.

**Flexible, Minimalist and Built To Scale****A Checkout That Moves With Your Business**

From rush-hour surges to new selling zones, the Portable Payment Center brings checkout wherever your business needs it. Its mobile, battery-powered design lets you open POS points on the floor or across locations.

With Standard and Pro configurations and a minimalist, modular architecture, you can deploy what you need today and scale effortlessly—without rethinking your strategy tomorrow.

**Proven Performance in Every Detail****Easy Setup:**

Tool-free setup with no wiring needed, allowing teams to deploy a complete POS system in minutes—anywhere it's needed.

**Flexibility with Add Ons:**

The Pro version includes an Ethernet port and a USB-C port for terminals, scanners, and peripherals. Built to scale with your business.

**Compatibility:**

Currently compatible with iPad or iPad mini (using MagTek Dynaflex II Go), with a future-ready design that supports USB-C tablets and card readers.

**Always Powered:**

A single battery powers both the tablet and payment terminal, while a 5-bay charger keeps spares ready for instant swaps—no downtime, no interruptions.
