

## S960

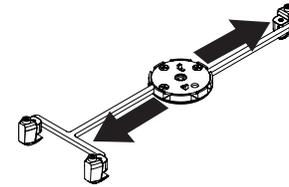

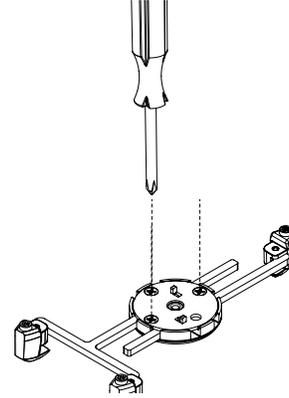

Tablet Viper Arm Bracket  
(DGT205-W, DGT205-B)

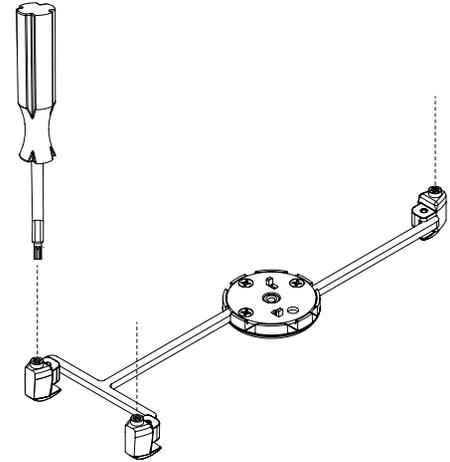

- 1 Wipe device with alcohol wipe. Let it dry completely.

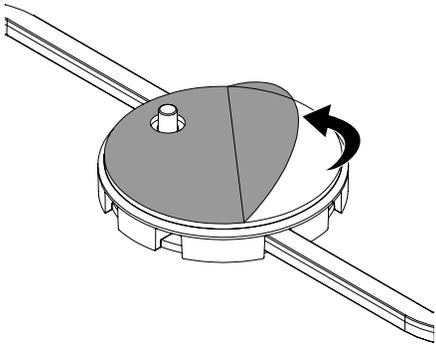

- 2 Use a Philips screwdriver to loosen screws on the mounting plate. **Do not remove screws.** Slide bracket arms outward.

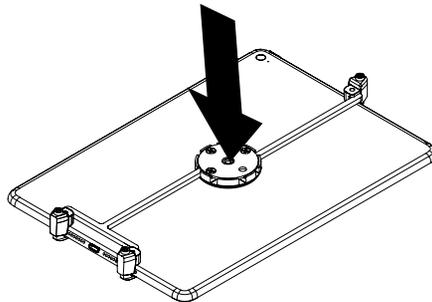

- 3 Use the T20 bit to loosen the screws on the bracket hands

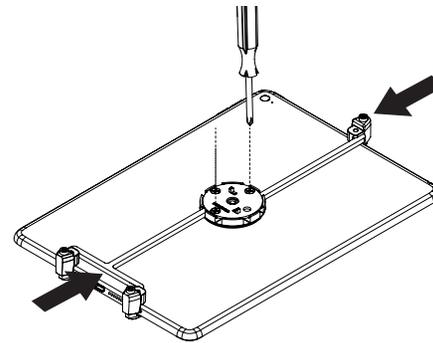

- 4 Remove clear film from the adhesive on the mounting plate.

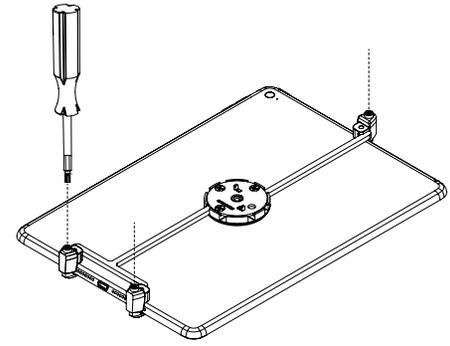

- 5 Position the mounting plate with the viper arm facing the power port on the device. Place mounting plate onto the center of the back of the device. Confirm bracket arms do not interfere with the power port. Press mounting plate firmly against the tablet for at least 10 seconds.

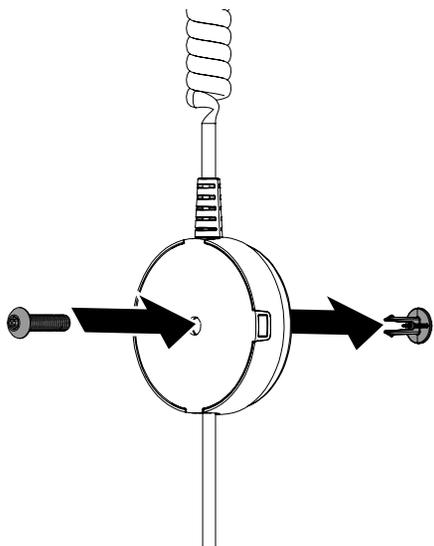

- 6 Slide bracket arms around the device. Use a Philips screwdriver to fully tighten the 3 screws on mounting plate.

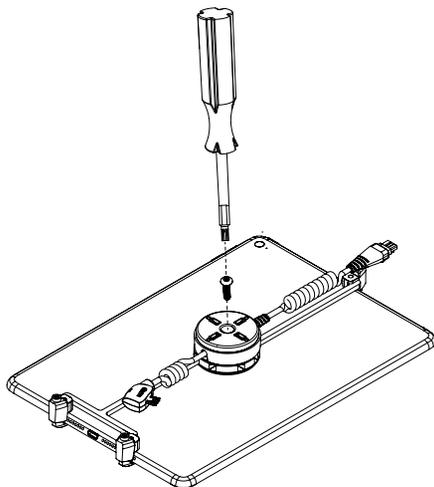

- 7 Use T20 bit to tighten the 3 screws on bracket hands. **Do not overtighten or damage may occur to the device.**

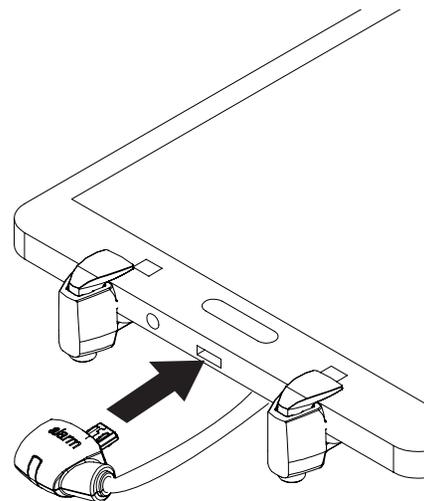

8 Use the mounting bracket screw to push the plug out from the sensor.

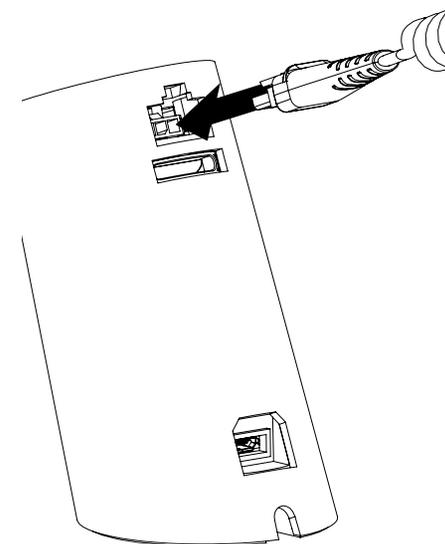

9 Use T20 bit to screw sensor to mounting plate using 1 provided screw.

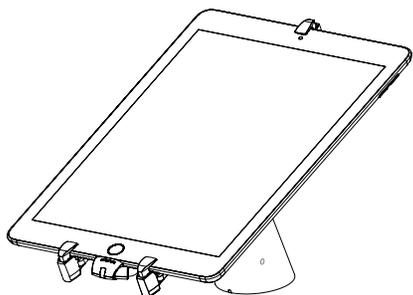

10 Plug power connector into device.

11 Plug sensor into stand.

12 Place Merchandise on stand. Final assembly should resemble image below.

SD04012 Rev2 06/15/17
