

CT101

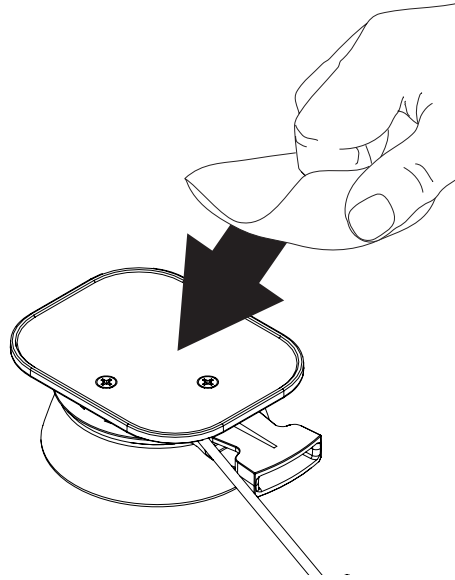

iPad 9.7 Gen5/6 & 10.2 Frame
CT1015-B/W

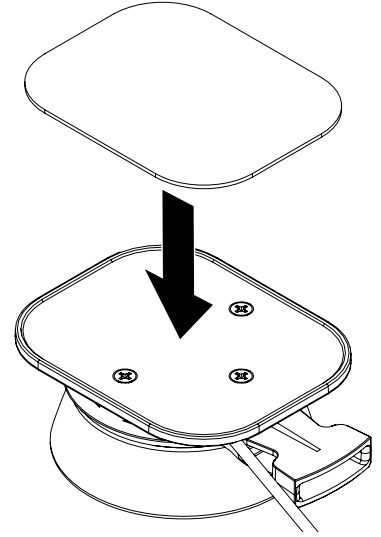

- 1** Use the detent to gently separate the cover from the frame.

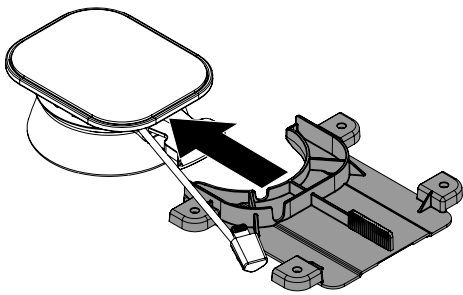

- 2** Use the alcohol wipe to clean the the flat surface on the puck.

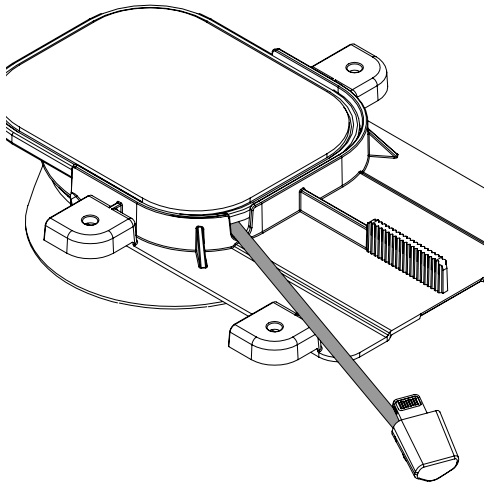

- 3** Remove the adhesive from its backing and place it on the puck. If there is a yellow plunger present on the puck, ensure that it fits into the cutout on the adhesive. Apply pressure for at least 10 seconds.

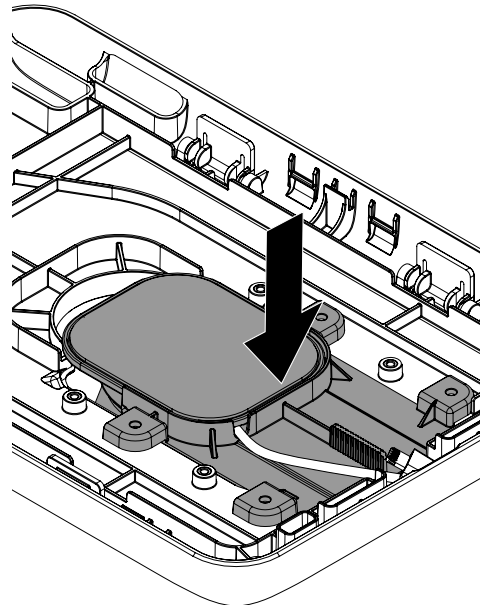

- 4a** Slide the insert onto the puck. The insert will fit between the power connector cable and the handstrap attachment.

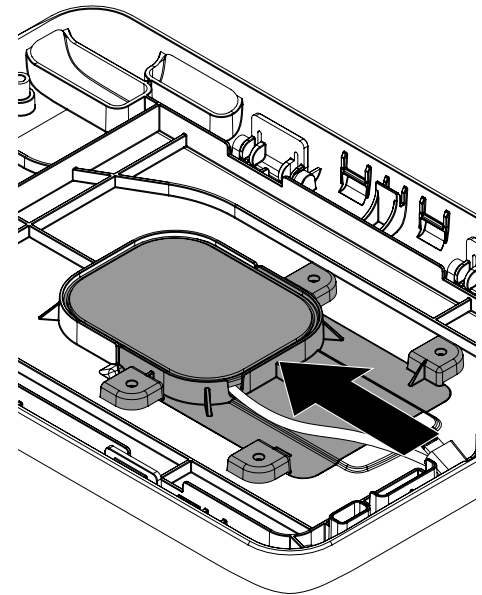

- 4b** Ensure that the power connector cable sits within the groove in the insert.

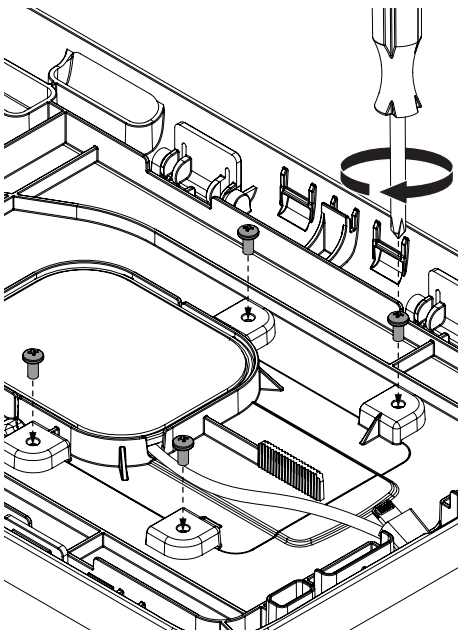

- 5** Place the puck and insert back into the frame.

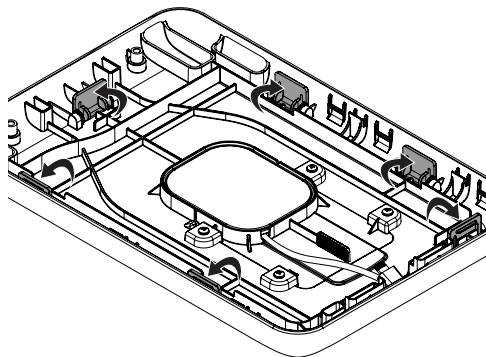

- 6** Slide the insert and puck back into the frame so that the screw holes align.

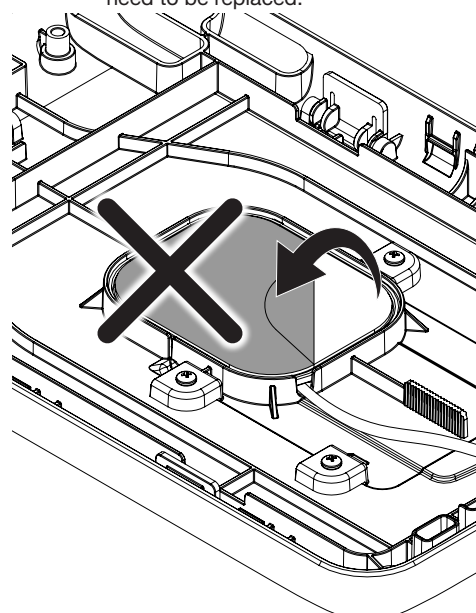

- 7** Insert and tighten the 4 screws to secure the insert and puck to the frame.

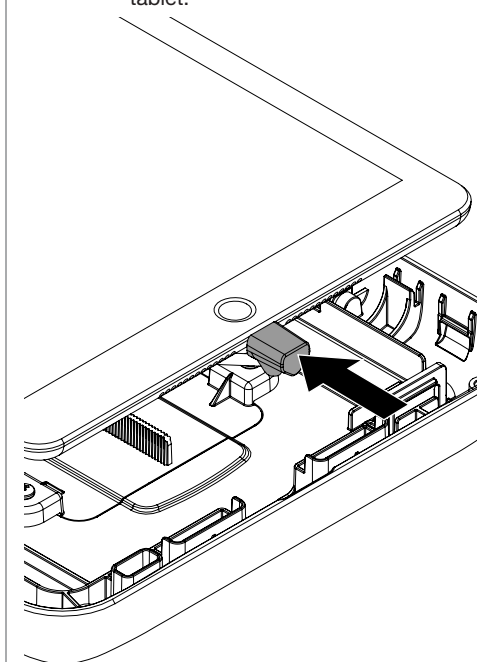

- 8** **Optional:**
If installing an iPad 9.7 Gen 5 or Gen 6, ensure that the interior spacer tabs are flipped up.

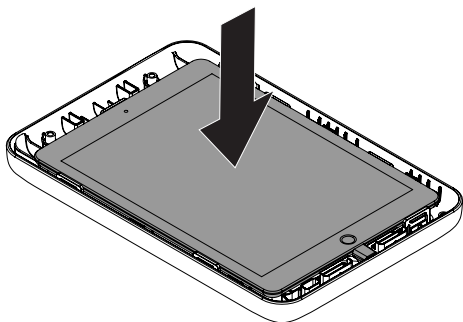

- 9** Do NOT remove the liner from the adhesive. If the adhesive is used, it is difficult to remove the tablet should it need to be replaced.

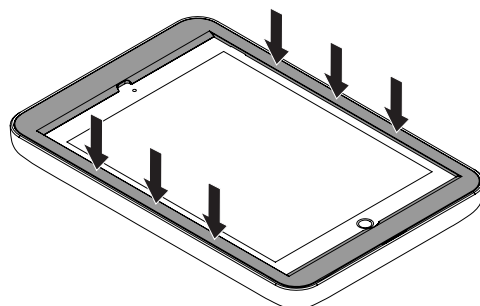

- 10** Plug the power connector into the tablet.

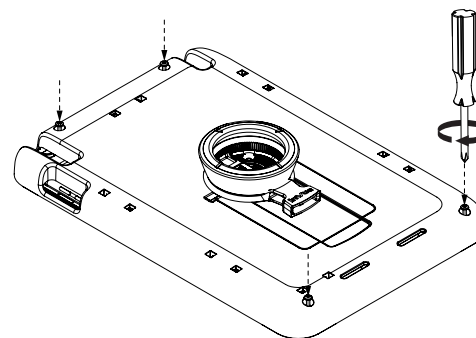

- 11** Place the tablet into the frame. Gently press the tablet against the puck for at least 10 seconds.

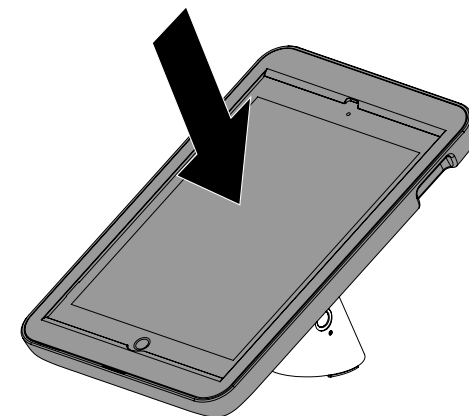

- 12** Snap the cover back into the frame.

- 13** Tighten the 4 screws using a Philips head screwdriver.

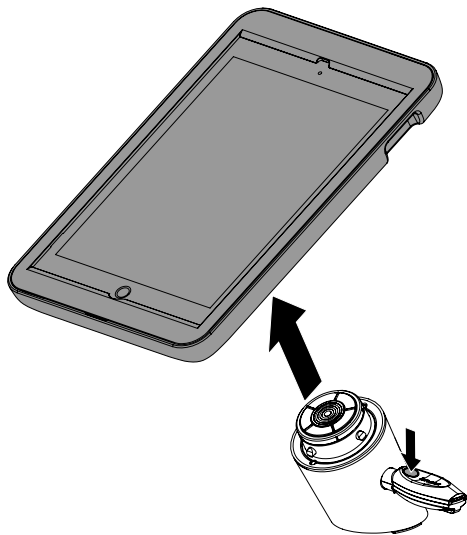

- 14** Place the tablet and frame onto a previously installed CT101 stand.

15

To remove the tablet and frame from the stand; place a coded CT Key or OneKEY against the lens on the side of the stand and press the button on the key. Lift the frame free.
