

Customer Self-Access

Remove the Wait. Not the Security.

Bring Self-Service Shopping to Secured Merchandise

Give trusted shoppers instant access to the merchandise they came to buy. Customer Self-Access enables secure self-service through multiple access methods, allowing customers to get products on their terms without waiting for an associate. Retailers maintain complete control over who can access merchandise—all without replacing existing fixtures.

WORK WITH WHAT YOU HAVE

Deploy Customer Self-Access without replacing existing fixtures. Compatible with OneKEY LIVE Locks, it builds on your current investment.

STAY IN CONTROL

Define who can access your merchandise, where self-service should be available, and how access is granted, all while maintaining complete visibility.

ADAPT AS YOU LEARN

Integrate Customer Self-Access where it delivers the greatest value, then expand by department, category, or location as your strategy evolves.

Multiple Ways to Enable Self-Access

QR Code Access:

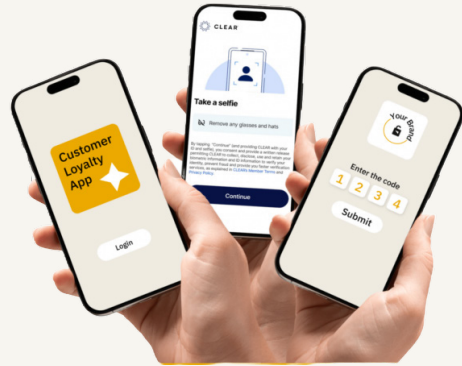

Customers scan a QR code and receive a unique access code via text message before merchandise is unlocked.

Retailer's Mobile App:

Integrate Customer Self-Access directly into your existing retail or loyalty application.

Third Party Verification:

Utilize trusted identity verification through InVue's partnership with Clear.

Compatible Applications

Cabinets & Drawers:

Swing-door cabinets, sliding-door cabinets, and drawers.

Display Cases:

Glass display cases and enclosed showcases.

Open Displays:

High-value product and interactive displays.

Merchandise Cages:

Secure storage and merchandising cages.

Custom Fixture:

Compatible with your custom retail fixtures.

And More:

Works across OneKEY LIVE Lock applications.
