Security That Enables Sell-Through

Smart Access connects your store's security devices, users, and access interactions into one intelligent system—helping retailers reduce shrink while improving how products are accessed, managed, and sold across the store.

Coverage Across Every Category.

Secure a wide range of retail products across your store—from open displays and hanging merchandise to locked cabinets—with one unified system that controls it all. OneKEY Smart Access secures more product types than any other single solution.

Turn Access Interaction Into Actionable Data

Every access interaction creates valuable operational insight. OneKEY connects data across devices, users, and stores—giving retailers a single place to analyze and manage what’s happening across their store.

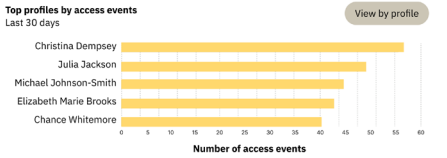

Unauthorized attempts
There have been attempts to access restricted items.

Turn product interaction into smarter decisions.

See what’s getting attention—and what isn’t—to spot opportunities and drive engagement.

Smart Access with OneKEY

Role-Based Access, Store-Wide Control

Manage Access Across Your Entire Store.

Retailers can assign precise permissions by role or individual, ensuring teams only access what they're authorized to manage. Permissions update instantly, making the system easy to manage—even across multiple stores, employees, and devices.

One Platform, Multiple Ways to Gain Access.

Smart Access supports multiple ways to unlock—electronic keys, mobile access, one-time permissions, and customer self access—all controlled by one centralized platform. Every interaction follows the same permission rules and visibility, ensuring secure, consistent access across the store.
