

OneKEY Detacher

The smarter way to remove security at checkout

Authorized Removal for a Smoother Checkout

OneKEY Detacher is a convenient merchandise security removal solution that helps associates efficiently serve customers at checkout. It combines quick detaching with secure associate access for seamless checkout operations and immediate customer service.

KEEP CHECKOUT MOVING

Help associates complete purchases faster with a checkout solution that's always in place, powered, and ready throughout an entire shift.

CONTROLLED AUTHORIZATIONS

Ensure only authorized associates can use the Detacher with store-specific credentials and automatic access expiration.

LESS EFFORT AT CHECKOUT

Detach all Invue Package Protection solutions with one tool that's easier to use than traditional magnetic detachers.

Proven Performance in Every Detail

OneKEY & OneKEY App Authorization

Authorize the Detacher using the OneKEY and OneKEY App, the same access methods associates already use throughout the store.

Shift-Long Authorized Access

Authorize associates once for an entire shift. Access automatically expires at the end of the authorization period and can be immediately revoked with Manual De-authorization when needed.

Authorization History

See who authorized each Detacher and when, improving accountability and operational visibility.

Store-Specific Security Credentials

Detachers only work with authorized credentials assigned to your store, preventing cross-store access.

Always Powered & Ready

Fixed at the checkout and continuously powered, the Detacher is always available for Package Protection removal.

Replaceable Swivel Cable

Built for constant checkout use with a kink-resistant, replaceable cable that helps extend product life and reduce maintenance.
