Laminate Selections

A three character sku identifies each laminate selection as well as the standard finish offered. Individual components are priced with standard finish on standard laminate.

A variety of Wilsonart® standard laminates with standard finishes is offered on conference and multipurpose tables. Additional colors may be available but are

subject to upcharges and extended lead times. The laminate option is available on components where noted as an option in the material specification code.

All laminate tops will have a 3mm matching edge band.

PLL Solid Laminate

Standard Solid

- 671 Designer White, Wilsonart D354-60 Matte Finish

- 682 Asian Night, Wilsonart 7949-16 Casual Rustic Finish

Veneer Selections

A three character sku identifies each species as well as the standard finish offered. Individual components are priced with standard finish. Special finishes on veneers made to customer specifications are subject to factory approval and a 10% net upcharge with a \$500 net minimum.

Transparent stains and sealers are applied in multiple steps to enhance the beauty of the natural wood. A durable, baked-on, top-coat of conversion varnish

or UV topcoat is applied to protect the product. It is recommended that felt, cork or fabric backed desk pads and accessories are used on worksurfaces to minimize wear.

When specifying light finishes the natural characteristics of the wood will be visible and color will vary. Paint finishes are available as custom orders. See terms and conditions for additional finish information.

Serif Tables

Designed for use in flexible environments requiring reconfigurations and easy storage, options include a variety of sizes of rectangular tables that may be used with a corner top to complete a configuration. These configurations include, but are not limited to, u-shape and closed conference as shown on right.

Serif table tops are 1¼" thick and available in either a wood veneer with a standard black underside or in a laminate with a black laminate underside. Grain will run the length of the table in veneer applications.

Aluminum bases are positioned in either an edge mount or an inset mount that allows users to be seated on all four sides of the table. Base styles are available with the option of 3" heavy-duty casters with non-marring urethane wheels or with adjustable leveling guides with a height adjustment range of ¾".

Aluminum bases are available in polished aluminum, and a variety of powder coat finishes.

Serif power options include grommet accessed power, surface power modules and dual under mount modules. A trough between bases provides a channel for wire management, electrical components and ganging bracket storage.

All tops have a multipurpose channel system designed for use with ganging brackets. Two ganging brackets are included with every table.

An optional modesty panel is available in a ½" thick laminate or wood veneer and a ¼" thick lightweight bright anodized aluminum finish panel. Twist clips insert into a pre-installed channel system. The modesty panel is hinged to swivel for storage.

Tables fold and nest for compact storage. Turning a handle, located underneath the table top, in a clockwise motion releases the top to fold. A gas spring allows the top to rest gently when folding or closing.

SCS Indoor Advantage™ Gold and LEVEL® 2 certified. See terms and conditions for additional environmental information.

Configuration Options

Closed Conference

U-Shaped

Base Design

The Serif table bases are positioned in either an inset mount or an edge mount. The inset mount allows for guests to be seated on all four sides of the table. The edge mount allows guests to be seated on the two long sides of the table and is designed to provide maximum user leg space in ganging application. Tables 24"w may be ganged on short ends only.

Finish selections for the Serif base are polished aluminum and a variety of powder coat finishes.

The base is available with either 3" heavy duty casters (2 locking, 2 non-locking) with non-marring urethane wheels or with adjustable leveling glides with a height adjustment range of $\frac{3}{4}$ ".

A trough between bases provides a channel for wire management and electrical components – only corded outlets for mobile applications are available.

An optional modesty panel may be used. Twist panel clips insert into pre-installed channels located on both sides of tables. The modesty panel is hinged to swivel when stored. Specify modesty panels separately.

Inset Mount Base

Edge Mount Base

Inset Mount Base Plan View

Edge Mount Base Plan View

Storage

Serif tables are designed to fold and nest for compact storage. The base design allows the top to be folded in a vertical position. When nested, each additional table adds only $6\frac{1}{2}$ " depth and $2\frac{3}{8}$ " width for storage.

A handle underneath the table top releases the top to fold when rotated in a clockwise motion. A gas spring allows the top to rest gently when it is either being folded or closed.

**Nested Storage Position
Back View**

Modesty Panel

Serif tables are available with a $\frac{3}{4}$ " thick modesty panel in laminate or wood veneer or a $\frac{1}{4}$ " thick lightweight bright anodized aluminum finish. Panels are 8" high with the veneer running the length of the panel.

Modesty panels are easily installed and removed by the use of simple twist-clips in conjunction with the channel system. The panel clips simply insert into the channel, then twist and lock into place. The modesty panels are hinged to swivel for storage. All tables fold and store with the modesty panels installed.

Base with Modesty Panel

Hinged Modesty Panel
Laminate or Veneer

Hinged Modesty Panel
Anodized Aluminum

Ganging Bracket

Ganging brackets hold Serif tables secure when ganged. Two brackets are required to gang each table together. Molded nylon brackets insert into channel systems located on the sides and ends of the table top. Closing a flap handle on the bracket pulls tops together and locks tables into place. Tables are released by lifting the handle on the bracket.

The Serif ganging bracket system allows tops to be ganged in any location along the channels of the tables.

Two brackets and storage plate are included with each table. The storage plate may be stored in the trough when brackets are not in use.

Patent Pending.

Grommet Location

The VFB, pass through grommet, is installed into the worksurface to allow the passage of wires through the surface to a power or communication source beneath. The units easily open for access or wire passage.

The placement of these grommets must be specified on the purchase order and cannot be changed or added after an order is acknowledged and entered into production. Below are the VFB grommet placement options.

Grommet and power modules must be specified separately.

Data and Communication Management

The data and communication management system for Serif is comprised of a basic faceplate (VSB) that supports the installation of various Extron® AAP (Architectural Adaptor Plated) components.

The VSB silver powder coated faceplate is designed to snap into the Serif cross rail. The faceplate has an opening that will accommodate (2) single-space sized AAPs or (1) double-space sized AAP.

Serif offers different styles of Extron AAP modules. These modules allow the table to provide CAT 5e or CAT 6 data for LAN communication and provide (2) different styles of computer and audio connections for laptop connectivity. A black plate is available to fill in the extra space on the VSB faceplate if only (1) single-space sized AAP is used.

Note: The VSB and the AAPs are specified separately and shipped unassembled.

Cross Section of Channel Rail in Base
VSB Data Faceplate with Extron Module

Power Management

Communication Grommets

Communication grommets are available with a polished aluminum frame and lid, or an aluminum frame with veneer or laminate lid to access power. The grommet may be installed in the center of the table or along the front edge. Specify grommet location on the purchase order.

A VFB grommet is used with the VSA corded power module. The VSA has a silver-painted faceplate with (4) 120-volt 15 amp grounded outlets, an integrated switch and breaker. The module has a 10' grounded cord and is designed to snap into the cross rail between the legs. UL Listed (EFile #E301437) and CSA Approved.

A grommet must be ordered separately to access power modules in the stretcher.

Surface Mount Power Modules

A surface mount module is available in three finishes: black with black receptacles; silver with black receptacles or white with white receptacles. The surface module is positioned in the center of the table and consists of (2) 15 amp receptacles, (1) 2 amp USB-A port, 10 watt and (1) 2 amp USB-C port, 20 watt. A 9' grounded power cord runs through the cross rail to connect direct to the power source.

Surface mount modules are factory installed. Specify the surface mounted corded power sku option for the appropriate base position and power will be included.

Surface Mount Power Module

Surface Mount Power Module

Serif offers a proprietary surface mount power solution allowing quick and easy daisy chain joining of tables. For the surface mount module configuration, up to four tables may be connected from a single power infeed.

The surface mount power configuration uses a (2) 15 amp receptacles, (1) 2 amp USB-A port, 10 watt and (1) 2 amp USB-C port, 20 watt module flush mounted in the center of the table.

A starter table must be specified to begin a run of tables. The starter table includes the power module control unit with the 9' cord with grounded plug that connects to the power source. It also provides circuiting allowing the add-on tables to be plugged together in any order, making set-up and reconfiguration quick and easy. All Serif tables are pre-machined for under mount power.

Surface mount configurations can only be daisy chained with other surface mount configurations. The Serif tables with power assembly are UL962 and CSA 22.2, No. 203.2 approved.

Connecting Tables With Surface Mount Power Modules

Dual Under Mount Power Module

Serif offers a proprietary under mount power solution allowing quick and easy daisy chain joining of tables. For the dual module configurations, up to four (4) tables may be connected from a single power infeed. Dual under mount power is not available for 24" tops.

The dual under mount configuration use a (1) 15 amp receptacle, (1) 2 amp USB-A port, 10 watt and (1) 2 amp USB-C port, 20 watt module that comes mounted at the edge of the table.

A starter table must be specified to begin a run of tables. The starter table includes the power module control unit with the 9' cord with grounded plug that connects to the power source. It also provides circuiting allowing the add-on tables to be plugged together in any order, making set-up and reconfiguration quick and easy.

Dual module configurations can only be daisy chained with other dual module configurations. The Serif tables with power assembly are UL962 and CSA 22.2, No. 203.2 approved.

Note: All power and wiring are pre-installed on starter and add-on tables. Specify a right or left power infeed for the starter and add-on tables in a configuration.

Prices and Specifications

Prices and specifications are subject to change without notice. All prices quoted will be FOB our factories. If applicable, sales tax will be based on ship-to destination.

Bernhardt Design reserves the right to make changes in dimensions, construction, price lists, or product literature without prior notice.

All measurements and weights are approximate and subject to change without notice.

Order Entry

All orders are subject to final acceptance by Bernhardt Design in Lenoir, NC. Receipt of our acknowledgment indicates acceptance of your order subject to the terms set forth on the acknowledgment.

Bernhardt Design attempts to clarify all purchase orders. However, in the event the price list number and description on the purchase order differ, the price list number will prevail.

Changes/Cancellation

All orders in production are considered firm orders and are not subject to changes or cancellation.

Shipping

Bernhardt Design will ship in accordance with customer instructions whenever possible. For convenience, Bernhardt Design offers a guaranteed freight program (GFP). Bernhardt Design will exercise our best judgment in selecting a carrier under our GFP. When selecting a carrier, Bernhardt Design will make our best effort to meet requested delivery dates.

Transportation lead-times and delays including equipment problems, weather, general traffic, traffic accidents, customer warehouse space, labor disputes, customer changes, etc., that occur on a carrier will not be the responsibility of Bernhardt Design. Furthermore, Bernhardt Design will not be responsible for additional costs incurred due to aforementioned delays.

For customers who decline our GFP, Bernhardt Design will stage orders for pick up at 1% of the list price, or \$75 minimum.

Customer orders in production will be shipped as scheduled and will not be held. Bernhardt Design reserves the right to make partial shipments on any order, unless notified otherwise by the customer.

High quality cartoning meeting trucking and railroad specifications is standard at no extra charge. Some items may be blanket wrapped for shipment.

Freight Damage and Claims

Bernhardt Design is not liable for any damages to products that occur during transit or storage. The carrier assumes all responsibility upon acceptance of product. It is the customer's responsibility to inspect products upon receipt and file any claims with the carrier. No product should be refused. If products are received damaged, a written exception should be made on the bill of lading and an immediate inspection be requested of the carrier.

Concealed damage must be reported to the carrier within 10 business days from date of delivery. Failure to make claims shall constitute acceptance of the products and waiver any claims of defects, errors or shortages.

In the event delivery is made on a Bernhardt Design truck, the products should be carefully inspected for transit damage. If contents are damaged, the driver should be notified to call his dispatcher for immediate disposition.

Concealed damage must be reported within 10 business days from date of delivery and product/package held for inspection by a Bernhardt Design representative. Replacements for product damaged in shipment or storage will be manufactured upon receipt of a purchase order.

Returns

No merchandise may be returned to Bernhardt Design without written consent in the form of a Return Authorization from our Quality Assurance Department stating why item is being returned and how item will be shipped.

Unauthorized returns will be automatically refused by our receiving department as well as returns not in accordance with Bernhardt Design shipping instructions. Liability for defective merchandise shall be limited to the replacement or repair of that merchandise, and Bernhardt Design shall not be liable for other damages or losses.

Terms and Credit

Pricing and terms of sale apply to orders accepted by Bernhardt Design, and no terms, stipulations, or conditions contained in the dealer's submitted purchase orders shall have any force or effect. Bernhardt Design requires a completed and signed credit application from every dealer. Bernhardt Design also requires dealers to provide a Blanket Certificate of Resale/Use containing valid sales tax exemption number(s) for their respective state(s).

If credit has been approved, the standard terms for all Bernhardt Design products are Net 30 from the invoice date. In certain instances, as an additional condition of order acceptance, buyer may be required to provide a deposit at time of order and/or remit the balance before shipment is released. If credit has not been approved, a 100% prepayment, including any freight charges, is required prior to production.

Acceptable forms of payment include a certified check or electronic bank transfer. For information on where to send check/electronic bank information contact our Financial Services Department. If a dealer or company check is submitted, three (3) weeks should be allowed for the clearance of the check. If electronic bank transfer is submitted, one (1) week should be allowed for the clearance of the electronic bank transfer. The order is subject to cancellation if payment in full is not received within three (3) weeks from the acknowledgment date.

The dealer may not make deductions for advertising, promotions, quality problems, freight, or any other reason without prior authorization by Bernhardt Design. Such a deduction could result in the curtailment or suspension of further shipments until the matter is resolved. Delinquency notices are generated and mailed periodically. Service charges of 18% per annum will be added to each past-due transaction. Unpaid service charges

will be accrued and invoiced on a periodic basis. Past-due notices may result in orders being held until the situation is resolved. This credit hold could prevent orders from being placed into production or shipped. Orders not in production that are placed on credit hold for three (3) weeks will be subject to cancellation.

Severe past-due situations may result in the employment of a collection agency or other collection litigation. If any collection activity is necessary regarding a dealer account, the dealer will be responsible for the payment of any and all attorney and collection agency fees.

A slow payment history may result in reducing or eliminating an open line of credit. At the discretion of Bernhardt Design, amounts owed by a dealer to Bernhardt Design arising from any transaction or dealings between the dealer and Bernhardt Design may be offset against any amounts owed to the dealer by Bernhardt Design.

Warranty

Bernhardt Design will repair or replace, at its discretion, any product or part thereof which fails as the result of defects in material and workmanship, under single shift use and normal care for five years from date of shipment. This warranty shall apply only to the original purchaser.

This warranty does not cover normal wear and tear, misuse or abuse of product, dramatic temperature changes, exposure to unusual conditions or damages incurred by contact with seating products, tables, desks or other surfaces. Natural color changes, variations or movements in lumber or veneer products, exposure to extreme temperature changes and direct sunlight may cause color changes and/or surface damage. These are circumstances beyond the control of Bernhardt Design and are not warranty issues. Repair or replacement of discontinued product will be at the discretion of Bernhardt Design.

This warranty is the customer's exclusive remedy for product defect and does not apply to damage caused by a freight carrier, dealer, installer, user modification, attachments to a product, or any third party. Bernhardt Design has the exclusive right to make the final determination of product misuse or abuse. Except as stated above, Bernhardt Design makes no express or implied warranties as to any product, and in particular, makes no warranty of merchantability or of fitness for any particular purpose. Bernhardt Design shall not be liable for any consequential or incidental damages or for commercial loss arising from any product defect.

Operational Parts Warranty

Drawer glides, drawer boxes, drawer pulls, and lock mechanisms have a Life-Time Warranty for original purchaser. Power and communication components are warranted for one year.

Parts Order

Bernhardt Design parts have a \$25 net minimum per order. This does not include freight costs.

Custom Design

Bernhardt Design may alter products to meet specific needs. Contact your local sales representative when a custom design is needed. Custom designs,

if approved, require minimum quantities, additional leadtime and upcharges. A custom job number, available from your Bernhardt Design sales representative, must be submitted with purchase orders.

Orders combining custom design with standard product cannot be scheduled for production until custom items are approved. Custom design orders are not subject to revision or cancellation after acknowledgment.

Wood Finishes

Bernhardt Design tables are available in finishes that are compatible with credenzas and seating finishes. However, finishes on tables may vary slightly from those on seating due to the natural characteristics of the wood. No absolute match is implied or guaranteed.

Light Finishes

Bernhardt Design offers lighter finishes on certain veneers and solid woods. When specifying light finishes the natural characteristics of the wood will be visible and color will vary.

Natural characteristics include the natural discolorations of the wood substance and color variations in glued up stock. These natural characteristics are not considered defects by Bernhardt Design, and therefore merchandise will not be replaced.

Special Finishes

Special finishes, made to customer specifications and subject to factory approval, may be available at a **10% net upcharge with a \$500 net minimum**.

Additional leadtime may be required for special finish items. Special finish orders will not be acknowledged until the special finish sample is approved in writing and received by Bernhardt Design Customer Service. Special finish orders are not subject to revision or cancellation after acknowledgment.

Installation and Maintenance

All freestanding tables and credenzas are equipped with leveling devices. Local floor conditions vary, and it is always necessary to properly adjust leveling devices. Proper leveling is essential to the alignment and function of doors and drawers.

Improperly leveled units result in misaligned doors and drawers and may impair locking mechanisms or other functional hardware.

After the initial installation of credenzas, it may be necessary to readjust and align the units to compensate for settling. This should be expected as a matter of routine maintenance and follow-up to assure proper case function.

Proper installation of Bernhardt Design tables and credenzas is the responsibility of the dealer. Improperly installed units can result in permanent damage to case components. Damage due to improperly installed furniture not covered under product warranty.

Orders combining custom design with standard product cannot be scheduled for production until custom items are approved. Custom design orders are not subject to revision or cancellation after acknowledgment.

Care and Cleaning

Finished wood surfaces should be cleaned with a soft damp cloth, wiping in the direction of the grain. Furniture should be buffed dry immediately with a soft cloth.

Design and Patent Rights

All of the products shown in Bernhardt Design catalogs and described in Bernhardt Design price lists are, and remain, the property of Bernhardt Design, with the sole right reserved to manufacture and to distribute.

Some of the product designs shown are patented in the United States and will remain the property of Bernhardt Design. Any reproduction of the products constitutes an infringement of patented copyright laws and will be subject to prosecution.

Environmental

Some tables and credenzas are LEVEL® for ANSI/BIFMA e3-2019 – Furniture Sustainability Standard and SCS Indoor Advantage™ Gold certified. Visit the product page at bernhardtdesign.com for certifications.

Preferred Carrier Guaranteed Freight Rates

Freight charges will be applied to orders as a separate line item based on the zones listed. Rates are based on zones with a minimum for each zone. All zones are located within the Continental United States.

The freight amount is calculated on the total merchandise list COM price. Additional freight fuel surcharges may apply. Rates are based on deliveries made Monday through Friday, 8 am until 5 pm.

All orders are shipped by Bernhardt Design company trucks or preferred carriers specified by Bernhardt Design. **If a purchase order does not specify that the product must ship complete, Bernhardt Design reserves the right to select the most effective shipping method necessary, including split shipments.** Dealer warehouse information, including phone number and contact name, must be specified on the purchase order.

Direct site deliveries may be requested with an additional freight cost. Requests for direct site deliveries must be made 2 weeks prior to the scheduled ship week and meet the following criteria:

- Minimum of half truckload
- Delivery site accessible by a 53' trailer
- Complete delivery site address with contact name and on-site phone number
- Labor available for unloading

Deliveries that do not meet the criteria must be directed to a receiver warehouse. If a receiver warehouse is not available, the dealer may make arrangements with their own 3rd party carrier. If a 3rd party carrier is elected, a contact name, phone number and e-mail address is required.

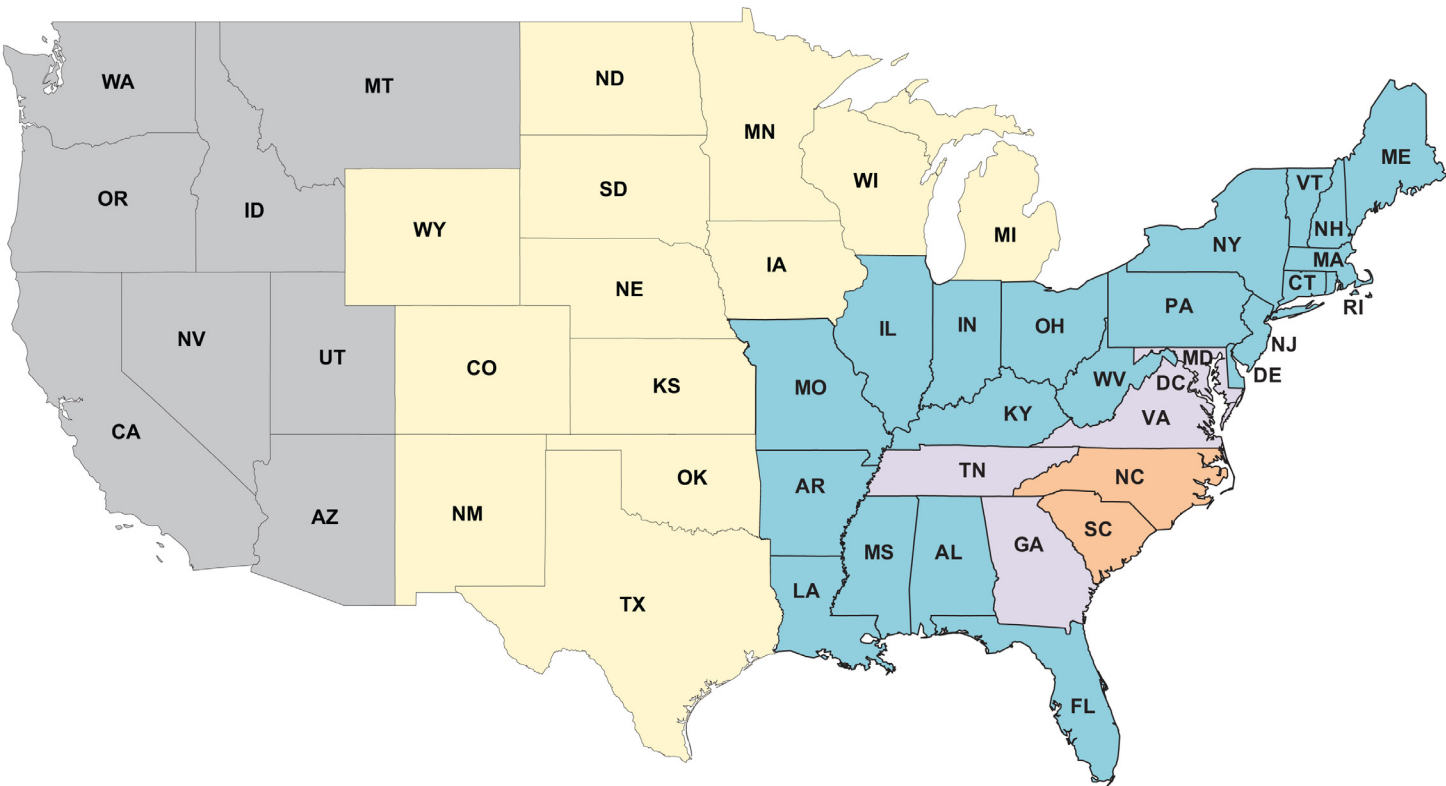

Bernhardt Design has a no touch freight policy. Drivers are not allowed to unload freight.

Weekend direct site deliveries will incur a \$500 per trailer weekend delivery fee. Weekend is defined as between 5 pm Friday and 8 am Monday.

Customers who decline GFP should refer to the shipping section of the Terms and Conditions page.

Zone	Percent	Minimum
Zone 1	3%	\$150
Zone 2	4%	\$150
Zone 3	5%	\$150
Zone 4	5.5%	\$150
Zone 5	6%	\$150

Percent bases on List Price.

Preferred Carrier Guaranteed Freight Rates - Canada

The freight amount is calculated on the total merchandise list COM price. Additional freight fuel surcharges may apply. Rates are based on deliveries made Monday through Friday, 8 am until 5 pm.

All orders are shipped by Bernhardt Design company trucks or preferred carriers specified by Bernhardt Design. **If a purchase order does not specify that the product must ship complete, Bernhardt Design reserves the right to select the most effective shipping method necessary, including split shipments.** Dealer warehouse information, including phone number and contact name, must be specified on the purchase order.

Direct site deliveries may be requested with an additional freight cost. Requests for direct site deliveries must be made 2 weeks prior to the scheduled ship week and meet the following criteria:

- Minimum of half truckload
- Delivery site accessible by a 53' trailer
- Complete delivery site address with contact name and on-site phone number
- Labor available for unloading

Deliveries that do not meet the criteria must be directed to a receiver warehouse. If a receiver warehouse is not available, the dealer may make arrangements with their own 3rd party carrier. If a 3rd party carrier is elected, a contact name, phone number and e-mail address is required.

Bernhardt Design has a no touch freight policy. Drivers are not allowed to unload freight.

Weekend direct site deliveries will incur a \$500 per trailer weekend delivery fee. Weekend is defined as between 5 pm Friday and 8 am Monday.

Customers who decline GFP should refer to the shipping section of the Terms and Conditions page.

Zone	Minimums	Freight	Avg. Bus. Days
Zone 1	\$200	5%	10 - 15
Zone 2	\$200	9%	10 - 15
Zone 3	\$200	8%	10 - 15
Zone 4	\$200	11%	10 - 15
Zone 5	Quote	Quote	

The attached rates are strictly freight and do not include brokerage fees.
