collection overview

Laminate Selections

A three character sku identifies each laminate selection as well as the standard finish offered. Individual components are priced with standard finish on standard laminate.

A variety of Wilsonart® standard laminates with standard finishes is offered on conference and multipurpose tables. Additional colors may be available but are

subject to upcharges and extended lead times. The laminate option is available on components where noted as an option in the material specification code.

All laminate tops will have a 3mm matching edge band.

PLL Solid Laminate

Standard Solid

- 671 Designer White, Wilsonart D354-60 Matte Finish
- 672 Frosty White, Wilsonart 1573-60 Matte Finish
- 673 Fashion Grey, Wilsonart D381-60 Matte Finish
- 674 North Sea, Wilsonart D90-60 Matte Finish
- 675 Black, Wilsonart 1595-60 Matte Finish

20% Upcharge

- 665 Snow White Velvet, Wilsonart 15501-31 Traceless Laminate
- 666 Charcoal Velvet, Wilsonart 15504-31 Traceless Laminate
- 667 Black Velvet, Wilsonart 15505-31 Traceless Laminate

WGL Woodgrain Laminate

Standard Woodgrain

- 684 Phantom Pearl, Wilsonart 8211K-28 Gloss Line Finish w/Aeon Scratch Resistant Protection
- 685 Raw Chestnut, Wilsonart 7975K-12 Soft Grain Finish w/Aeon Scratch Resistant Protection
- 686 High Line, Wilsonart 7970K-18 Linearity Finish w/Aeon Scratch Resistant Protection
- 678 New Age Oak, Wilsonart 7938-16 Casual Rustic Finish
- 679 Brazilwood, Wilsonart 7946-38 Matte Finish
- 687 Boardwalk Oak, Wilsonart 7983-38 Fine Velvet Finish
- 683 Portico Teak (Grey), Wilsonart 8210K-28 Gloss Line Finish
- 681 Studio Teak, Wilsonart 7960-16 Casual Rustic Finish
- 680 Walnut Heights, Wilsonart 7965K-12 Soft Grain Finish
- 682 Asian Night, Wilsonart 7949-16 Casual Rustic Finish

Veneer Selections

A three character sku identifies each species as well as the standard finish offered. Individual components are priced with standard finish. Special finishes on veneers made to customer specifications are subject to factory approval and a 10% net upcharge with a \$500 net minimum.

Transparent stains and sealers are applied in multiple steps to enhance the beauty of the natural wood. A durable, baked-on, top-coat of conversion varnish

or UV topcoat is applied to protect the product. It is recommended that felt, cork or fabric backed desk pads and accessories are used on worksurfaces to minimize wear.

When specifying light finishes the natural characteristics of the wood will be visible and color will vary. Paint finishes are available as custom orders. See terms and conditions for additional finish information.

Hudson Tables

Hudson tables are designed for use in flexible environments requiring reconfigurations and easy storage. Table options include a rectangular, teleconference and a half-round table. Configurations include but are not limited to u-shape, closed conference and classroom as shown on the right.

Hudson table tops are 1" thick and available in four options: wood veneer, wood veneer with a plywood edge, laminate and laminate with a plywood edge. Grain will run the length of the table in veneer applications. Pre-installed ganging brackets are included for all tables.

The collection offers two styles of aluminum bases: T-base and C-base. T-Bases are positioned in the center of the table with either an edge or an inset mount that allows users to be seated on all sides of the table. C-bases are positioned in the front of the table with a front edge mount only, and users are seated on one side of the table only. Base styles are available with 2½" heavy-duty casters with non-marring urethane wheels.

Aluminum bases are available in a variety of powder coat finishes. See page 7 for powder coat finish selection.

Hudson power options include trough mounted modules and surface power modules. A trough between bases provides a channel for wire management and electrical components. A removable cover located on the inside of the base provides wire management access and conceals cables.

Tables fold and nest for compact storage. Turning a handle, located underneath the table top, in a clockwise motion releases the top to fold. A gas spring allows the top to rest gently when folding or closing.

An optional modesty panel is available for field installation. Clips mount in premachined locations with provided hardware. The modesty panel is hinged to swivel for storage.

SCS Indoor Advantage™ Gold and LEVEL® 2 certified. See terms and conditions for additional environmental information.

Configuration Options

U-Shaped Configuration

Closed Conference Configuration

Closed Conference Configuration

Classroom Configuration

C-base Design

The C-base is available in a edge mounted position only. The edge mount allows guests to be seated on one of the long sides of the table with an optional modesty panel installed on the opposite side.

Powder coat finish selections are available for the C-base. See page 7 for powder coat finish selections.

The C-base is available with 2½" heavy duty casters (2 locking, 2 non-locking) with non-marring urethane wheels.

A trough between bases provides a channel for wire management, electrical components and ganging bracket storage. A removable cover located on the inside of the base leg provides wire management access and conceals cables.

An optional modesty panel may be used with C-bases. The modesty panel is hinged to swivel when stored. Specify modesty panels separately.

Passes ANSI/BIFMA X5.5-2014.

C-base

C-base
Plan View

C-base Storage

Hudson tables are designed to fold and nest for compact storage. The C-base design allows the top to be folded in an angled vertical position. **When nested, each additional table adds only 8⅞" depth and 1⅞" width for storage.**

Turning a handle, located underneath the table top, in a clockwise motion releases the top to fold. A gas spring allows the top to rest gently when it is either being folded or closed.

End View with Optional Modesty Panel

Nested Storage Position
End View with Optional Modesty Panel

Nested Storage Position
Back View

T-base Design

The T-bases are positioned in either an inset mount or an edge mount. The inset mount allows for guests to be seated on all four sides of the table. The edge mount allows guests to be seated on the two long sides of the table and is designed to provide maximum user leg space in ganging application.

Powder coat finish selections are available for the T-base. See page 7 for powder coat finish selections.

The T-base is available with 2½" heavy duty casters (2 locking, 2 non-locking) with non-marring urethane wheels.

A trough between bases provides a channel for wire management, electrical components and ganging bracket storage. A removable cover located on the outside of the base provides wire management access and conceals cables.

An optional modesty panel may be used with T-bases. The modesty panel is hinged to swivel when stored. Specify modesty panels separately.

Passes ANSI/BIFMA X5.5-2014.

Example shown uses a 60" w Table

Modesty Panel

Hudson tables are available with a 1/4" thick anodized aluminum modesty panel. Modesty panels are easily installed and removed by the use of hanging in conjunction with pre-machined holes. The panel clips simply insert into the channel. The modesty panels are hinged to swivel for storage. All tables fold and store with the modesty panels installed.

Powder coat finishes are available for the modesty panel, see page 7 for powder coat finish selection.

**Hinged Modesty Panel
Anodized Aluminum**

C-base with Modesty Panel

T-base with Modesty Panel

Attaching the Modesty Panel

Using (2) #8 wood screws, secure modesty panel attachment bracket to table top. Once secured, modesty panel will clip into the channel.

Ganging Bracket

Hudson tables feature pre-installed ganging brackets making it easier to provide a secure method for connecting tables. Position tables in desired grouping, with table ends touching, then connect the pre-installed ganging brackets. Tables can only be connected at table ends.

Ganged Bracket

PowerBridge Power Module

Hudson offers a unique and extremely flexible way to address the power needs of a training table. The Hudson table PowerBridge is a stand-alone power module that snaps into the center of the Hudson wire trough and provides instant power for the table. Having this flexibility provides the opportunity for the PowerBridge to be moved from table to table or to be added after a project has been installed without having to alter the tables in any way. It even gives the end user the ability to take PowerBridge units from one room to another as demand and needs change.

The PowerBridge is offered in a configuration that provides (2) 15 amp receptacles, (2) 2 amp USB-A ports, 10 watt and (2) 2 amp USB-C ports, 20 watt. It can be specified in a 9' braided cord with integrated surge suppressor or with our interlink IQ daisy chain system.

The corded PowerBridge option is UL listed as a Furniture Power Distribution Unit (FPDU) for UL962 and the listing number is E235403.

The interlink IQ PowerBridge options are ETL Listed and UL Recognized as a Furniture Power Distribution Unit (FPDU) for UL962 and the listing number is E315615.

When used with the Hudson T-base configurations the whole table assembly is ETL listed for UL962 as an assembly.

PowerBridge Power Module

Installation of PowerBridge on Hudson Trough

The PowerBridge is designed to be snapped into place in the center of the wire trough and between the two top supports. This will securely locate the unit and allow for easy plugging and unplugging of power and charging cords. For removal or relocation simply pull up on the tabs on the back of the unit to free it from the trough. **Note: The PowerBridge must be located between the two top supports for the top to fit properly.**

A convenient wire management clip is located in the trough of every table so any wire that is connected to the PowerBridge can be routed through this clip and kept neatly out of the way of the user.

Step 1: Align trough mount power module with PowerBridge.

Step 2: Clip power module into PowerBridge

Route power cords through wire management clip on the underside of the table top.

PowerBridge Cable Routing

Corded and Daisy Chained

The PowerBridge power module offers (2) 15 amp receptacles, (2) 2 amp USB-A ports, 10 watt and (2) 2 amp USB-C ports, 20 watt available in both corded and daisy chained. PowerBridge is easily mounted to the Hudson table trough without tools. The corded version features a 9' cotton braided zig zag pattern cord and is UL listed. The daisy chained option features snap fit connectors for ease of connection with a 9' braided cord. To utilize the daisy chained PowerBridge specify a starter unit on the first table and the add-on sku on connection tables. Tables 48" - 60" in width can be daisy chained up to 8 tables (1 starter, 7 add-ons). Tables 66" - 84" can only be daisy chained up to 4 tables (1 starter, 3 add-ons).

PowerBridge is specified separately and installed by the end user.

Corded PowerBridge Cable Routing

Step 1: Locate power cord.

Step 2: Route power cord through wire management clips attached to power trough.

Step 3: Route power cord down leg and install in floor mount

PowerBridge Daisy Chain Cable Routing

Step 1: Align male and female sequential connectors.

Step 2: Push together connectors and make sure you have a strong connection.

Step 3: Route power cord down leg and install in floor mount.

PowerBridge Power Module

Hudson offers a proprietary PowerBridge trough mount power solution allowing quick and easy daisy chain joining of tables. For the trough mount configurations, up to (8) tables may be connected to a single power infeed.

The PowerBridge power uses a (2) 15 amp receptacles, (1) 2 amp USB-A ports and (2) 2 amp USB-C ports module flush mounted in multiple locations on the table.

A starter PowerBridge must be specified separately to begin a run of tables. This starter unit includes the power module control unit with the 9' grounded plug that connects to the power source. It also provides circuiting allowing add-on tables to be plugged into each other in any order, making set-up and reconfiguration quick and easy. PowerBridge configurations can only be daisy chained with other PowerBridge configurations.

The PowerBridge power unit is UL Listed as a corded assembly. It is UL recognized/ETL Listed as a daisy-chained unit. Both the C-base and T-base assemblies are BIFMA certified. For markets that require it, the **T-base table assemblies** are UL 962 and CSA 22.2 No. 203.2 Listed as assemblies with power.

Note: All power specified separately. To specify PowerBridge units see page 28.

Dean Power Module

Hudson offers a Dean surface mount power solution allowing quick and easy daisy chain joining of tables. For the surface mount configurations, up to (8) tables may be connected to a single power infeed.

The Dean surface mount power configuration uses a (2) 15 amp receptacles, (1) 2 amp USB-A port, and (1) 2 amp USB-C port module flush mounted in multiple locations on the table.

A starter Dean unit must be specified separately to begin a run of tables. This starter table includes the power module control unit with the 9' grounded plug that connects to the power source. It also provides circuiting allowing add-on tables to be plugged into each other in any order, making set-up and reconfiguration quick and easy. Surface mount configurations can only be daisy chained with other surface mount configurations.

The Dean power unit is UL/ETL Listed as a corded assembly. It is UL recognized/ETL Listed as a daisy-chained unit. Both the C-base and T-base assemblies are BIFMA certified. For markets that require it, the **T-base table assemblies** are UL 962 and CSA 22.2 No. 203.2 Listed as assemblies with power.

Note: All power specified separately. To specify Dean units see page 29.

Connecting Tables With Dean Surface Power Modules

Dean Power Module

Dean Power Module

Dean surface mount power is installed into a work surface to allow the passage of wires through the surface to a power or communication source beneath. Power modules must be specified separately.

Tables with two grommet locations will require two Dean surface mount power units. On a starter table the first power module will be a DPS and the second power module will be a DPA. On an add-on table a DPA unit would be used for both locations.

The exact placement code of the grommet must be specified on the purchase order and cannot be changed or added after an order is acknowledged and entered into production.

Use the codes shown to the right to specify grommet locations.

Specify Dean grommet separately

Configurations + Power

The configurations below illustrate the number of receptacles in a particular work configuration. The set-ups shown are only some of the many configurations possible. Every situation is unique and should be assessed appropriately.

Please note that the power source needs to be located within 6' of each starter table. Maximum system wattage usage is 1440 watts (120volts x 12 Amps). If exceeds system circuit breaker will trip. Reset on "brain" unit installed on starter tables.

- Starter Table
- Add-on Table
- Power Source

PowerBridge and Single Dean

A maximum of (8) 48"w - 60"w tables can be daisy chained together when the single, centered power unit option is specified.

A maximum of (4) 66"w - 72"w tables can be daisy chained together when the single, centered power unit option is specified. This is due to a limited cord length which requires an extra jumper for each table. Each jumper, per code, counts as a power unit which reduces the quantity that can be daisy chained.

Dean configurations can only be daisy chained with other Dean configurations. PowerBridge configurations can only be daisy chained with other PowerBridge configurations.

Large Closed Conference

Conference set up with (8) 66"w - 72"w tables with surface mount power units, totaling (16) receptacles and (8) dual USB ports. Requires the customer to order (2) starter tables to power the configuration.

Classroom Seating

Classroom set up with (24) 48"w - 60"w tables with surface mount power units, totaling (16) receptacles and (8) dual USB ports per row. Requires the customer to order (1) starter table to power a row of (8) tables.

Small Closed Conference

Conference set up with (8) 66"w - 72"w tables with surface mount power units, totaling (16) receptacles and (8) dual USB ports. Requires the customer to order (2) starter tables to power the configuration.

Dual Dean Surface Power Module

A maximum of (4) tables can be daisy chained together when the dual surface mount power option is specified.

Dual module configurations can only be daisy chained with other dual module configurations.

Large Closed Conference

Conference set up with (8) tables with Dean power units, totaling (16) receptacles and (8) dual USB ports. Requires the customer to order (2) starter tables to power the configuration.

Classroom Seating

Classroom set up with (18) tables with Dean power units, totaling (12) receptacles and (6) dual USB ports per row. Requires the customer to order (6) starter tables to power the configuration.

Small Closed Conference

Conference set up with (8) tables with Dean power units, totaling (16) receptacles and (8) dual USB ports. Requires the customer to order (2) starter tables to power the configuration.

Prices and Specifications

Prices and specifications are subject to change without notice. All prices quoted will be FOB our factories. If applicable, sales tax will be based on ship-to destination.

Bernhardt Design reserves the right to make changes in dimensions, construction, price lists, or product literature without prior notice.

All measurements and weights are approximate and subject to change without notice.

Order Entry

All orders are subject to final acceptance by Bernhardt Design in Lenoir, NC. Receipt of our acknowledgment indicates acceptance of your order subject to the terms set forth on the acknowledgment.

Bernhardt Design attempts to clarify all purchase orders. However, in the event the price list number and description on the purchase order differ, the price list number will prevail.

Changes/Cancellation

All orders in production are considered firm orders and are not subject to changes or cancellation.

Shipping

Bernhardt Design will ship in accordance with customer instructions whenever possible. For convenience, Bernhardt Design offers a guaranteed freight program (GFP). Bernhardt Design will exercise our best judgment in selecting a carrier under our GFP. When selecting a carrier, Bernhardt Design will make our best effort to meet requested delivery dates.

Transportation lead-times and delays including equipment problems, weather, general traffic, traffic accidents, customer warehouse space, labor disputes, customer changes, etc., that occur on a carrier will not be the responsibility of Bernhardt Design. Furthermore, Bernhardt Design will not be responsible for additional costs incurred due to aforementioned delays.

For customers who decline our GFP, Bernhardt Design will stage orders for pick up at 1% of the list price, or \$75 minimum.

Customer orders in production will be shipped as scheduled and will not be held. Bernhardt Design reserves the right to make partial shipments on any order, unless notified otherwise by the customer.

High quality cartoning meeting trucking and railroad specifications is standard at no extra charge. Some items may be blanket wrapped for shipment.

Freight Damage and Claims

Bernhardt Design is not liable for any damages to products that occur during transit or storage. The carrier assumes all responsibility upon acceptance of product. It is the customer's responsibility to inspect products upon receipt and file any claims with the carrier. No product should be refused. If products are received damaged, a written exception should be made on the bill of lading and an immediate inspection be requested of the carrier.

Concealed damage must be reported to the carrier within 10 business days from date of delivery. Failure to make claims shall constitute acceptance of the products and waiver any claims of defects, errors or shortages.

In the event delivery is made on a Bernhardt Design truck, the products should be carefully inspected for transit damage. If contents are damaged, the driver should be notified to call his dispatcher for immediate disposition.

Concealed damage must be reported within 10 business days from date of delivery and product/packaging held for inspection by a Bernhardt Design representative. Replacements for product damaged in shipment or storage will be manufactured upon receipt of a purchase order.

Returns

No merchandise may be returned to Bernhardt Design without written consent in the form of a Return Authorization from our Quality Assurance Department stating why item is being returned and how item will be shipped.

Unauthorized returns will be automatically refused by our receiving department as well as returns not in accordance with Bernhardt Design shipping instructions. Liability for defective merchandise shall be limited to the replacement or repair of that merchandise, and Bernhardt Design shall not be liable for other damages or losses.

Terms and Credit

Pricing and terms of sale apply to orders accepted by Bernhardt Design, and no terms, stipulations, or conditions contained in the dealer's submitted purchase orders shall have any force or effect. Bernhardt Design requires a completed and signed credit application from every dealer. Bernhardt Design also requires dealers to provide a Blanket Certificate of Resale/Use containing valid sales tax exemption number(s) for their respective state(s).

If credit has been approved, the standard terms for all Bernhardt Design products are Net 30 from the invoice date. In certain instances, as an additional condition of order acceptance, buyer may be required to provide a deposit at time of order and/or remit the balance before shipment is released. If credit has not been approved, a 100% prepayment, including any freight charges, is required prior to production.

Acceptable forms of payment include a certified check or electronic bank transfer. For information on where to send check/electronic bank information contact our Financial Services Department. If a dealer or company check is submitted, three (3) weeks should be allowed for the clearance of the check. If electronic bank transfer is submitted, one (1) week should be allowed for the clearance of the electronic bank transfer. The order is subject to cancellation if payment in full is not received within three (3) weeks from the acknowledgment date.

The dealer may not make deductions for advertising, promotions, quality problems, freight, or any other reason without prior authorization by Bernhardt Design. Such a deduction could result in the curtailment or suspension of further shipments until the matter is resolved. Delinquency notices are generated and mailed periodically. Service charges of 18% per annum will be added to each past-due transaction. Unpaid service charges

will be accrued and invoiced on a periodic basis. Past-due notices may result in orders being held until the situation is resolved. This credit hold could prevent orders from being placed into production or shipped. Orders not in production that are placed on credit hold for three (3) weeks will be subject to cancellation.

Severe past-due situations may result in the employment of a collection agency or other collection litigation. If any collection activity is necessary regarding a dealer account, the dealer will be responsible for the payment of any and all attorney and collection agency fees.

A slow payment history may result in reducing or eliminating an open line of credit. At the discretion of Bernhardt Design, amounts owed by a dealer to Bernhardt Design arising from any transaction or dealings between the dealer and Bernhardt Design may be offset against any amounts owed to the dealer by Bernhardt Design.

Warranty

Bernhardt Design will repair or replace, at its discretion, any product or part thereof which fails as the result of defects in material and workmanship, under single shift use and normal care for five years from date of shipment. This warranty shall apply only to the original purchaser.

This warranty does not cover normal wear and tear, misuse or abuse of product, dramatic temperature changes, exposure to unusual conditions or damages incurred by contact with seating products, tables, desks or other surfaces. Natural color changes, variations or movements in lumber or veneer products, exposure to extreme temperature changes and direct sunlight may cause color changes and/or surface damage. These are circumstances beyond the control of Bernhardt Design and are not warranty issues. Repair or replacement of discontinued product will be at the discretion of Bernhardt Design.

This warranty is the customer's exclusive remedy for product defect and does not apply to damage caused by a freight carrier, dealer, installer, user modification, attachments to a product, or any third party. Bernhardt Design has the exclusive right to make the final determination of product misuse or abuse. Except as stated above, Bernhardt Design makes no express or implied warranties as to any product, and in particular, makes no warranty of merchantability or of fitness for any particular purpose. Bernhardt Design shall not be liable for any consequential or incidental damages or for commercial loss arising from any product defect.

Operational Parts Warranty

Drawer glides, drawer boxes, drawer pulls, and lock mechanisms have a Life-Time Warranty for original purchaser. Power and communication components are warranted for one year.

Parts Order

Bernhardt Design parts have a \$25 net minimum per order. This does not include freight costs.

Custom Design

Bernhardt Design may alter products to meet specific needs. Contact your local sales representative when a custom design is needed. Custom designs,

if approved, require minimum quantities, additional leadtime and upcharges.

A custom job number, available from your Bernhardt Design sales representative, must be submitted with purchase orders.

Orders combining custom design with standard product cannot be scheduled for production until custom items are approved. Custom design orders are not subject to revision or cancellation after acknowledgment.

Wood Finishes

Bernhardt Design tables are available in finishes that are compatible with credenzas and seating finishes. However, finishes on tables may vary slightly from those on seating due to the natural characteristics of the wood. No absolute match is implied or guaranteed.

Light Finishes

Bernhardt Design offers lighter finishes on certain veneers and solid woods. When specifying light finishes the natural characteristics of the wood will be visible and color will vary.

Natural characteristics include the natural discolorations of the wood substance and color variations in glued up stock. These natural characteristics are not considered defects by Bernhardt Design, and therefore merchandise will not be replaced.

Special Finishes

Special finishes, made to customer specifications and subject to factory approval, may be available at a **10% net upcharge with a \$500 net minimum**.

Additional leadtime may be required for special finish items. Special finish orders will not be acknowledged until the special finish sample is approved in writing and received by Bernhardt Design Customer Service. Special finish orders are not subject to revision or cancellation after acknowledgment.

Installation and Maintenance

All freestanding tables and credenzas are equipped with leveling devices. Local floor conditions vary, and it is always necessary to properly adjust leveling devices. Proper leveling is essential to the alignment and function of doors and drawers.

Improperly leveled units result in misaligned doors and drawers and may impair locking mechanisms or other functional hardware.

After the initial installation of credenzas, it may be necessary to readjust and align the units to compensate for settling. This should be expected as a matter of routine maintenance and follow-up to assure proper case function.

Proper installation of Bernhardt Design tables and credenzas is the responsibility of the dealer. Improperly installed units can result in permanent damage to case components. Damage due to improperly installed furniture not covered under product warranty.

Orders combining custom design with standard product cannot be scheduled for production until custom items are approved. Custom design orders are not subject to revision or cancellation after acknowledgment.

Care and Cleaning

Finished wood surfaces should be cleaned with a soft damp cloth, wiping in the direction of the grain. Furniture should be buffed dry immediately with a soft cloth.

Design and Patent Rights

All of the products shown in Bernhardt Design catalogs and described in Bernhardt Design price lists are, and remain, the property of Bernhardt Design, with the sole right reserved to manufacture and to distribute.

Some of the product designs shown are patented in the United States and will remain the property of Bernhardt Design. Any reproduction of the products constitutes an infringement of patented copyright laws and will be subject to prosecution.

Environmental

Some tables and credenzas are LEVEL® for ANSI/BIFMA e3-2019 – Furniture Sustainability Standard and SCS Indoor Advantage™ Gold certified. Visit the product page at bernhardtdesign.com for certifications.

Preferred Carrier Guaranteed Freight Rates

Freight charges will be applied to orders as a separate line item based on the zones listed. Rates are based on zones with a minimum for each zone. All zones are located within the Continental United States.

The freight amount is calculated on the total merchandise list COM price. Additional freight fuel surcharges may apply. Rates are based on deliveries made Monday through Friday, 8 am until 5 pm.

All orders are shipped by Bernhardt Design company trucks or preferred carriers specified by Bernhardt Design. **If a purchase order does not specify that the product must ship complete, Bernhardt Design reserves the right to select the most effective shipping method necessary, including split shipments.** Dealer warehouse information, including phone number and contact name, must be specified on the purchase order.

Direct site deliveries may be requested with an additional freight cost. Requests for direct site deliveries must be made 2 weeks prior to the scheduled ship week and meet the following criteria:

- Minimum of half truckload
- Delivery site accessible by a 53' trailer
- Complete delivery site address with contact name and on-site phone number
- Labor available for unloading

Deliveries that do not meet the criteria must be directed to a receiver warehouse. If a receiver warehouse is not available, the dealer may make arrangements with their own 3rd party carrier. If a 3rd party carrier is elected, a contact name, phone number and e-mail address is required.

Bernhardt Design has a no touch freight policy. Drivers are not allowed to unload freight.

Weekend direct site deliveries will incur a \$500 per trailer weekend delivery fee. Weekend is defined as between 5 pm Friday and 8 am Monday.

Customers who decline GFP should refer to the shipping section of the Terms and Conditions page.

Zone	Percent	Minimum
Zone 1	3%	\$150
Zone 2	4%	\$150
Zone 3	5%	\$150
Zone 4	5.5%	\$150
Zone 5	6%	\$150

Percent bases on List Price.

Preferred Carrier Guaranteed Freight Rates - Canada

Freight charges will be applied to orders as a separate line item based on the zones listed. Rates are based on zones with a minimum for each zone.

The freight amount is calculated on the total merchandise list COM price. Additional freight fuel surcharges may apply. Rates are based on deliveries made Monday through Friday, 8 am until 5 pm.

All orders are shipped by Bernhardt Design company trucks or preferred carriers specified by Bernhardt Design. **If a purchase order does not specify that the product must ship complete, Bernhardt Design reserves the right to select the most effective shipping method necessary, including split shipments.** Dealer warehouse information, including phone number and contact name, must be specified on the purchase order.

Direct site deliveries may be requested with an additional freight cost. Requests for direct site deliveries must be made 2 weeks prior to the scheduled ship week and meet the following criteria:

- Minimum of half truckload
- Delivery site accessible by a 53' trailer
- Complete delivery site address with contact name and on-site phone number
- Labor available for unloading

Deliveries that do not meet the criteria must be directed to a receiver warehouse. If a receiver warehouse is not available, the dealer may make arrangements with their own 3rd party carrier. If a 3rd party carrier is elected, a contact name, phone number and e-mail address is required.

Bernhardt Design has a no touch freight policy. Drivers are not allowed to unload freight.

Weekend direct site deliveries will incur a \$500 per trailer weekend delivery fee. Weekend is defined as between 5 pm Friday and 8 am Monday.

Customers who decline GFP should refer to the shipping section of the Terms and Conditions page.

Zone	Minimums	Freight	Avg. Bus. Days
Zone 1	\$200	5%	10 - 15
Zone 2	\$200	9%	10 - 15
Zone 3	\$200	8%	10 - 15
Zone 4	\$200	11%	10 - 15
Zone 5	Quote	Quote	

The attached rates are strictly freight and do not include brokerage fees.
