

Model 1050 Syringe Filling System

SYSTEM FEATURES:

Eliminates cross-contamination and minimizes cleanup and downtime during product changeover using disposable fluid path technology

Minimizes air entrapment using a nozzle-end filling process with pre-inserted plunger

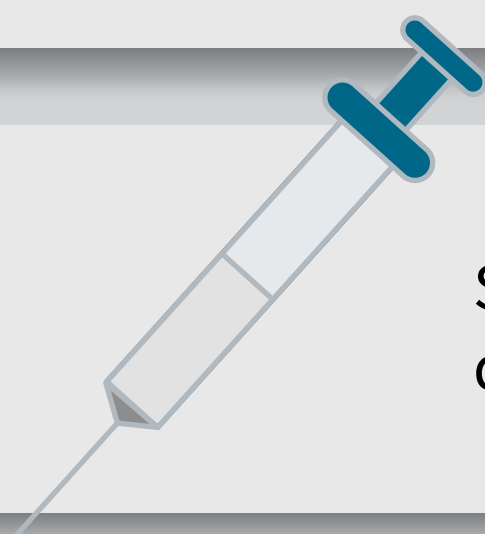

Accurate and consistent fills each time using an adjustable, positive, mechanical stop

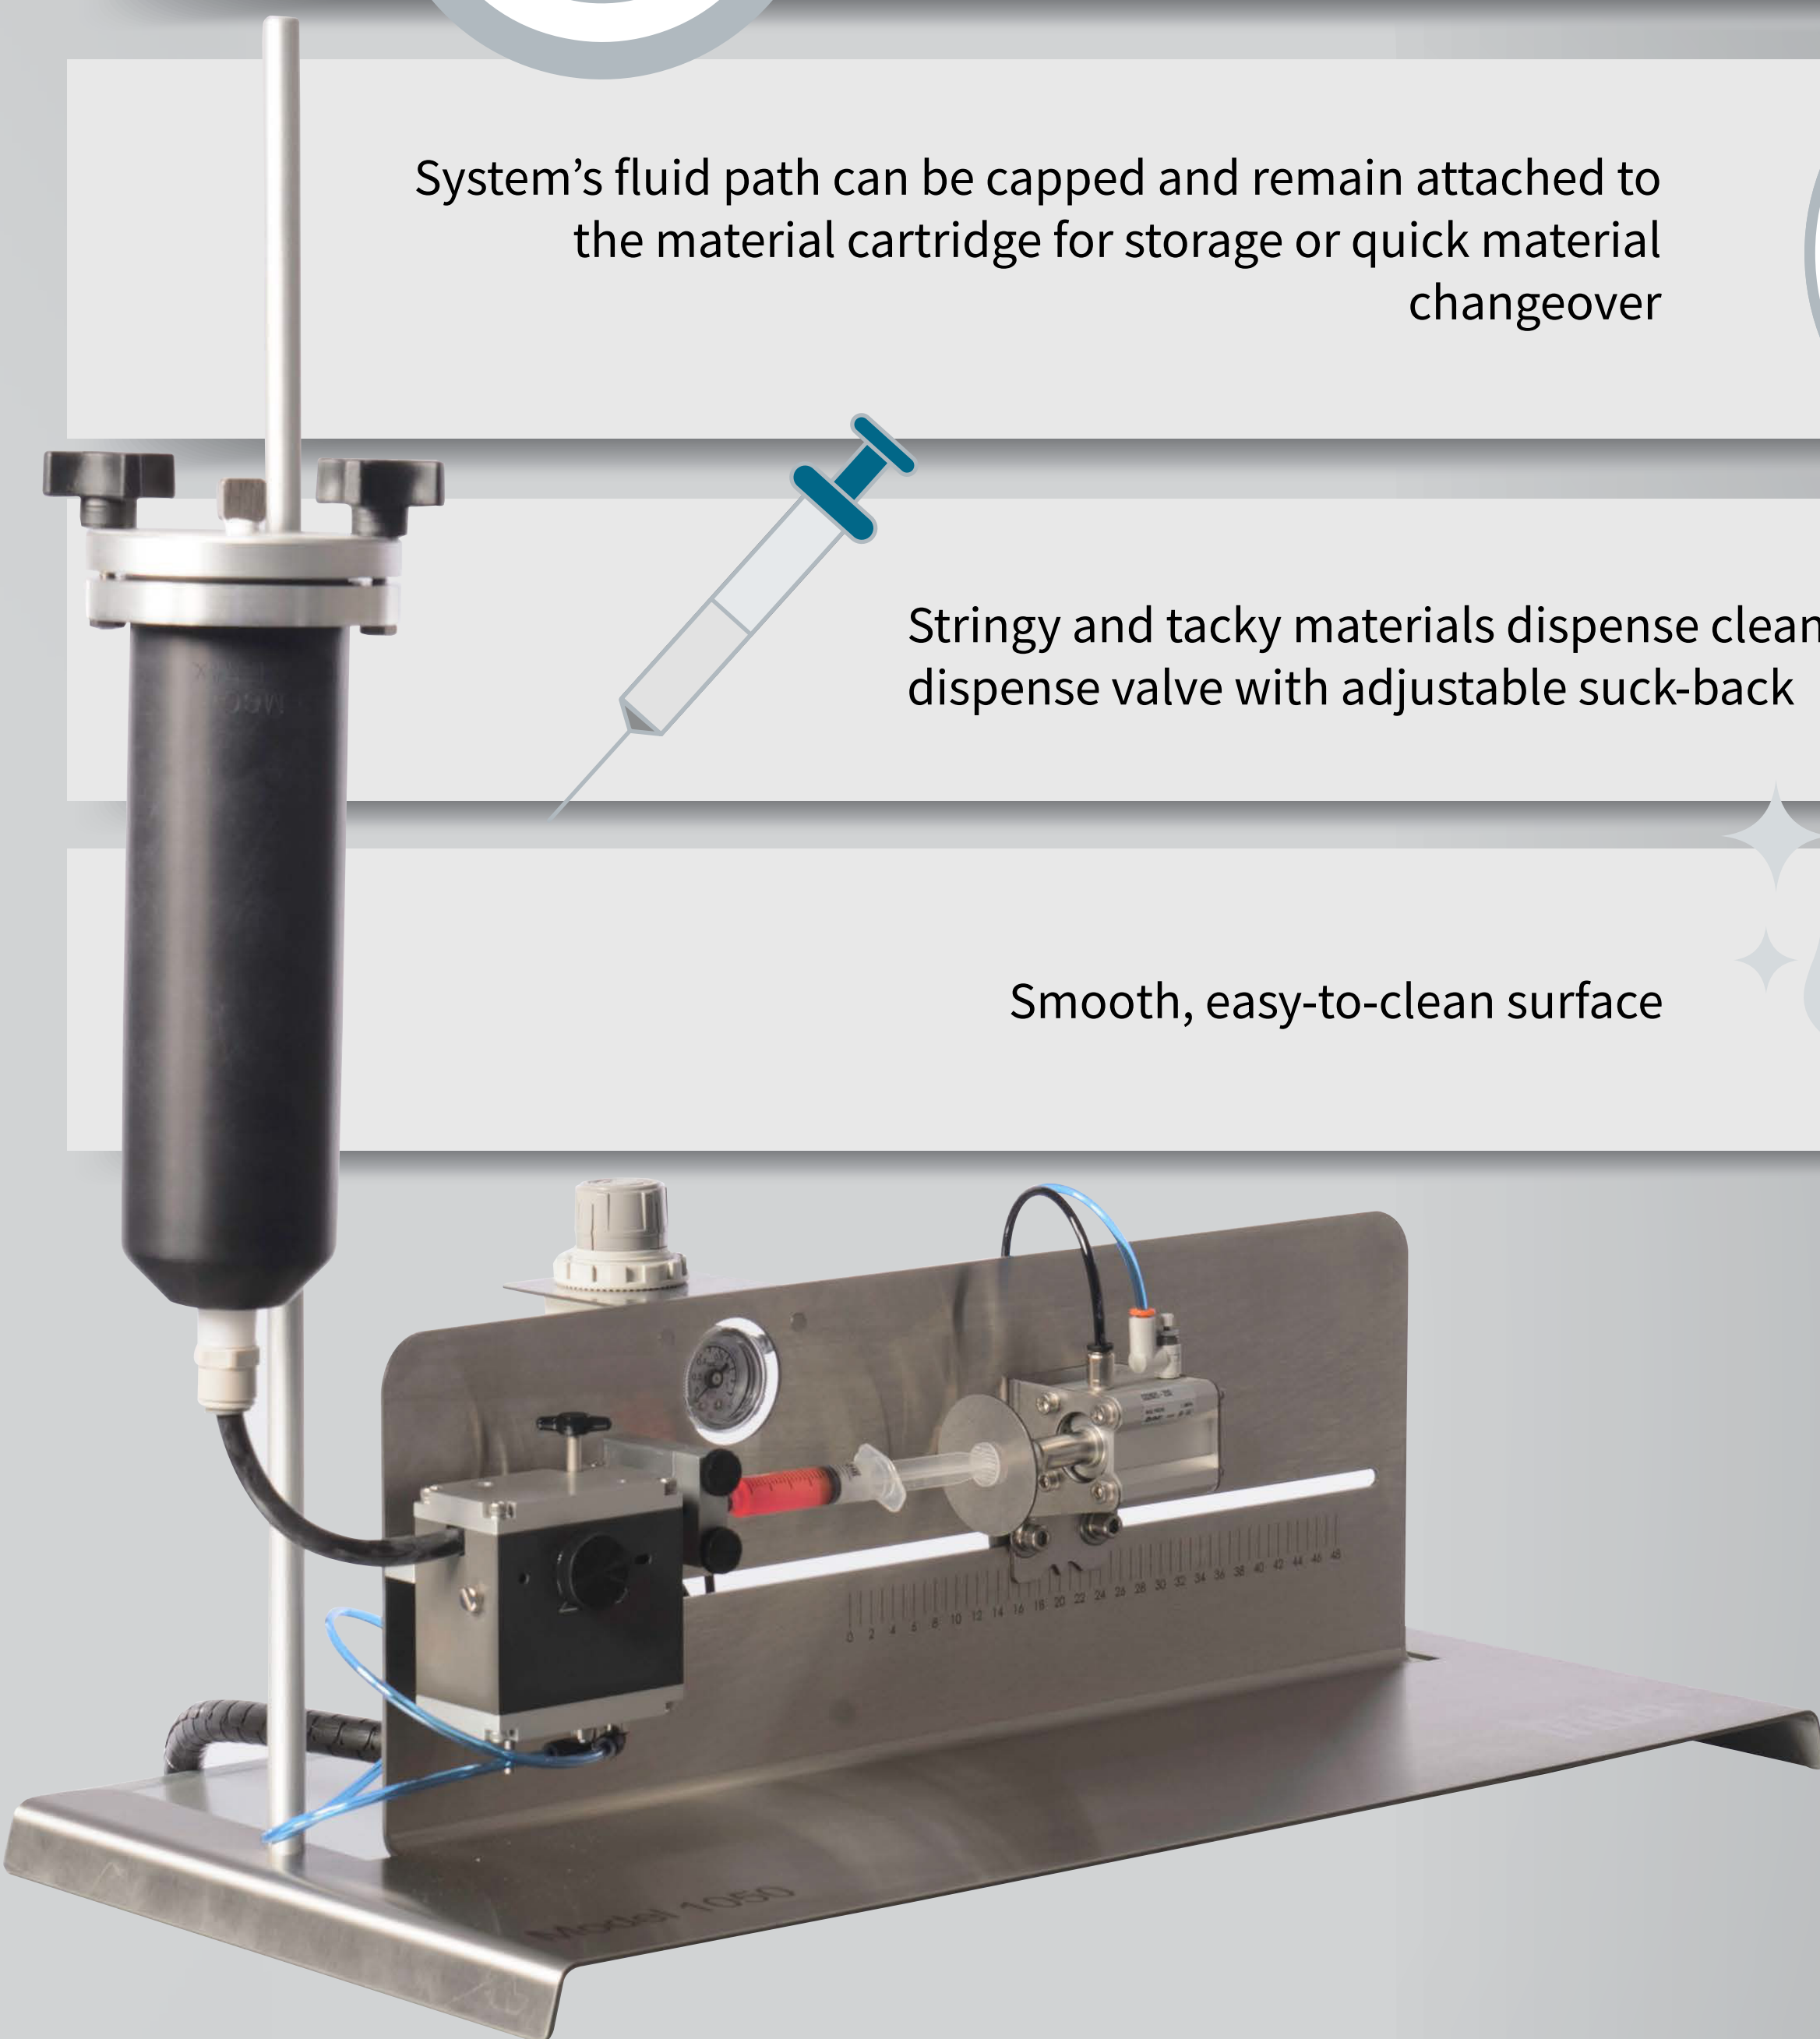

System's fluid path can be capped and remain attached to the material cartridge for storage or quick material changeover

Stringy and tacky materials dispense cleanly using dispense valve with adjustable suck-back

Smooth, easy-to-clean surface

Tridak® specializes in the manufacture of bench-top and semi-automated systems for filling cartridges and syringes. Our filling systems are easy to use and cost effective – offering quick, repeatable filling, and years of trouble-free service.
