CARE AND CLEANING

LEATHER

Under normal usage conditions, regular dusting and vacuum cleaning in crevices or under cushions is all that is necessary to clean your furniture.

For minor spots and spills:

Wipe any excess liquid up immediately with a clean absorbent cloth or sponge. If necessary, use a lightly moistened soft cloth with distilled water and let air dry naturally. Do not dry with hair dryers.

For stubborn stains:

Moisten a soft cloth or sponge with distilled water. Apply gently to all soiled portions of the leather surface. Remove water by wiping with a clean damp cloth. Blot dry with another clean soft cloth, then let air dry naturally. If the stain persists, it is recommended that the leather be cleaned by a professional leather specialist to avoid any potential damage.

For butter, oil or grease:

Blot excess butter, oil or grease off the leather with a clean dry cloth. Do not scrub or rub the area – blot only. The spot should dissipate into the leather after a short period of time. Do not apply water or try to wash a butter, oil or grease spot.

DO NOT USE:

Saddle soap, cleaning solvents, furniture polish, oils, varnish, abrasive cleaners, detergent soaps or ammonia water.

Note:

For stubborn stains, clean the surface using a cloth slightly dampened with distilled water. These are recommended or suggested methods of cleaning. Always try any cleaning method in a hidden area first to test the results. The manufacturer is not responsible for damage incurred while cleaning.

Like any upholstery material, all leathers can fade to some degree if exposed to the sun or direct light.
