Revolutionary Acoustic Threat Detection (ATD)

Exceptional accuracy gives you the confidence to tackle threats quickly. Each individual sensor has the ability to detect and locate threats immediately.

How ATD Works

DETECT AND LOCATE THREATS IMMEDIATELY

Monitor activity and receive rapid alerts to real-time tracking information through your existing access control system.

There are no limitations to the number of sensors you can install to ensure no threats go undetected.

With a camera attached to every sensor, you'll never respond to a threatening situation blindly. Our agile surveillance cameras have a wide range of motion so that you never lose sight of a threat.

Protection Any Time, Any Place

**LIVE IN THE MOMENT, WHEREVER
YOUR DAY TAKES YOU.**

Alert your team to threats with real-time data on your control system so you can make quick and informed response decisions. When a gunshot is heard, our cutting edge technology identifies the location of the threat.

Why Choose ATD?

Peace of Mind

You can't be everywhere at once, but ACOEM ATD can be. Give your first responders eyes and ears in the field around the clock so your community knows you are always watching out for them.

Smarter Security

Hearing a gunshot is not enough. Our surveillance cameras give you the ability to see the threat your community is facing so that you never respond to a threatening situation blindly.

Speed

Be in the know the moment a threat arises. ATD detects and locates gunshots to allow you to take control of the situation before it escalates.

Accessibility

Affordable and versatile, ACOEM ATD has a solution for everyone. Secure public establishments of all types and sizes whether they're indoors or outdoors.

Reliability

Power your security system with military-proven protection you can depend on. With the same AcoustiSense technology we've been using to protect service members on the combat frontlines for the last 25 years, using AcoustiSense will ensure your community is in good hands.

Work, relax, live, and learn worry-free

Whether you're exploring downtown, learning in class, enjoying a concert, or hard at work, we know creating safe spaces for people to engage is crucial to maintaining flourishing communities that we call home.
