*Credit per kWh will be equal to the average Cost per kWh for the applicable 24-month period prior to calculation of any Credit.

For example, the Year 2 Credit will be based upon the average Cost per kWh during Year 1 and Year 2. So, if the Cost per kWh was \$0.150 in Year 1 and the Cost per kWh was \$0.170 during Year 2, then the "Year 2" Credit would be \$0.160.
