

Environmental Commitment

FORTE™ OPENING SOLUTIONS' COMMITMENT

Efficiency and environmental sustainability are a proud part of our culture at Forte Opening Solutions. We continue to strive to be the most comprehensive resource for our distributors, architects and the design community on the ever-changing requirements for sustainable design.

At Forte Opening Solutions, we work with our suppliers, customers and employees to continuously raise our environmental and safety standards while building value.

We are proud of our achievements in sustainability. An important component of corporate social responsibility is reflected in the types of products we manufacture and sell. In fact, every one of our doors is available with at least one of these environmental attributes:

LEED v4

BUILDING PRODUCT DISCLOSURE AND OPTIMIZATION - ENVIRONMENTAL PRODUCT DECLARATIONS

Option 1. environmental product declaration (EPD)

- Product-specific Type III EPD

BUILDING PRODUCT DISCLOSURE AND OPTIMIZATION - SOURCING OF RAW MATERIALS

Option 2. leadership extraction practices

- Certified Wood
- Recycled content

BUILDING PRODUCT DISCLOSURE AND OPTIMIZATION - MATERIAL INGREDIENTS

- Safety Data Sheets (SDS) available upon request

LOW-EMITTING MATERIALS

- Products that comply with the requirements of the Composite Wood Evaluation
 - » CARB ULEF doors available in addition to CARB NAUF
- Doors are also 3rd party certified to SCS Global Services SCS Indoor Advantage Gold Certification Program, not available in Aspiro Stile and Rail.

Additionally, commitment to sustainability means acting in a way that reduces our impact on the world around us. Although we can never fully eliminate our footprint on the environment, we can and will strive to reduce it.

We have witnessed significant progress in recent years in the dedication to manufacturing and supplying increasingly sustainable products. We continue to make strides to minimize our environmental impact in manufacturing, distribution and in the products we supply.
