Quality acoustic design within the care home and healthcare environments can help improve health outcomes and help patients heal faster from illness. Good acoustic design can also help minimize noise transmitted to resident suites for better rest.

Acoustically sound to
ensure quiet room suites
and common areas

Doors that are
purposeful based on use

Durable surfaces that
stand up to high traffic

Finishes that match the
desired environment

PERFORMANCE SOLUTIONS

- **Fire-Rated** — Meets life safety building codes to protect residents, employees and visitors. Available in 20/45/60/90 minute ratings
- **Acoustic (STC) Rated 30 to 46** — Increases privacy and reduces noise to meet codes and guidelines
- **Factory Finishes** — Durable UV finishes made from environmentally sensitive water based polyurethane
- **Choice of Laminates** — High Pressure Decorative Laminates (HPDL)
- **Factory Installed Glass and Mirror (surface applied or flush mirror)** — Meets building codes and standards
- **Environmental Attributes** — Contributes towards sustainable building codes and standards
- **Performance Measurement** — ANSI/WDMA/AWI/AWMAC
