

# Stains Cross-Reference Guide

## Introducing Pre-Matched Custom Colors

As we transition some of our former standard colors to custom, we are also introducing pre-matched custom colors to simplify the ordering process and minimize lead times. This change is part of our effort to create space for new, on-trend colors while ensuring continued access to discontinued options. Here's how our pre-matched custom color process works:

- **Continued Access to Discontinued Colors:** While we're discontinuing certain standard colors, we recognize there may still be a need for these colors for replacement doors or customer preferences. Our pre-matched custom colors provide a streamlined way to order these discontinued colors without the wait for custom matching and approval.
- **No Approval Required:** These pre-matched custom colors use the original formulas and fall within the standard color range, so no additional approval is needed. For customers wanting to review and approve a pre-matched color before ordering, please request a "sample only" through our online custom color request form at [forteopenings.com/samples](https://forteopenings.com/samples).
- **Custom Variations Available:** If you need a variation of a former standard color, submit a custom color request at [forteopenings.com/samples](https://forteopenings.com/samples). A unique custom number will be assigned, and approval will be required, which may extend lead time.
- **No Standard Samples:** As part of our transition, the former standard colors will no longer be included in our standard samples program. If you require a submittal sample for these discontinued pre-matched custom colors, please submit your request through our online form at [forteopenings.com/samples](https://forteopenings.com/samples).
- **No Expiration:** Pre-matched custom colors will remain available indefinitely, so you can access them anytime without worrying about expiration.
- **Cross-Reference Guide:** Access our easy-to-use cross-reference guide for quick custom color look-up. The chart provides a six-digit custom color number that corresponds to each former legacy stain color name. Simply enter this number into our configurator's custom color field to place your order.

Algoma/JC	Exact Match	Closest Match	New Color Name/#	Color Type	Exceptions
RA1050	-	Caramel	240008	Custom	
RA1051	-	Bourbon	240009	Custom
