

Factory-Finished Stained Wood Doors

Door Solutions Made Simple

Your Single Source to Find the Right Door for any Opening

By combining decades of door industry experience with real-time building needs and trends, we deliver highly-tailored architectural and commercial door solutions, perfectly aligned with end-market needs.

A flawless finish for any room. Delivered with a factory finish and perfect for projects that require high-quality performance and a superior appearance, our wood veneer doors offer unmatched consistency and customization.

Consistent Results

Field finishing has its limitations. When it comes to achieving a uniform texture, color and sheen, nothing matches the factory finish of our stained wood door offerings with their UV-cured topcoat and sealant for a long-lasting, durable door surface that stands the test of time.

Beautiful Surfaces

Non-solvent-based stains, sealants and topcoats bring out the wood veneer's natural grain while providing a superior appearance, burnish, texture and endurance.

Meets or Exceeds Industry Standards

The Window and Door Manufacturers Association recommends a factory finish, and Forte™ Opening Solutions wood stain finish system meets or exceeds WDMA TR-8/AWS System 9 for flush wood doors.

Light and Bright

Create a sense of openness with this palette of light stains. Paired with a protective clear topcoat, these stains enhance the natural beauty of lighter select veneers, including white oak and white maple.

Standard Colors

Our best value with a range of options to meet the needs of most projects.

Honey

Sandstone

Dusty Canyon

Wheatfield

Antique Barrel

Standard+ Colors

Trend-inspired hues available at a slight premium over standard, for a more customized look without the custom price.

Specify with Confidence

Two Lines for a Simple Spec

Our two-tiered portfolio makes it simpler to select doors based on your specific performance and budget requirements. Choose from Forte™ Opening Solutions Aspiro® Series architectural doors for the most aesthetic and performance options. Choose Forte Opening Solutions Cendura® Series commercial doors for everyday style and reliable durability.

Dark and Warm

Create rich appeal and elegant contrast with darker stains for wood species where more natural variation occurs, such as rotary natural birch and walnut. These statement-making stain colors add a touch of luxury to any space.

Standard Colors

Our best value with a range of options to meet the needs of most projects.
