Mitered Rim Panel

The traditional look of a stile and rail door with mitered rims creates that sought-after distinct and structured pattern.

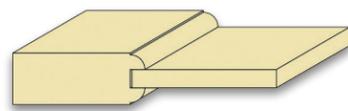

STANDARD COLORS

STANDARD+ COLORS

Interior mitered rim panel profile

Flat Panel

A contemporary update to the stile and rail look, flat panel doors are a great alternative to barn and shaker doors and feature clean lines with a smooth feel.

Custom Projects Deserve Custom Solutions

Bring your project's unique vision to life with Forte's expertly crafted doors. We're proud to offer the highest degree of customization to match any design aesthetic.

Factory Machining

We take pride in the accuracy of our London, Ontario machining department. With precise measurements and tooling, we are able to prepare a door to your exact specifications.

Factory Finishing

Our factory finish is crafted to furniture-grade quality and includes stains specially formulated to enhance the natural characteristics of authentic wood grain. Choose from clear, standard, and standard+ color options or a custom color match for your project.

For interior doors, our advanced catalyzed conversion varnish enhances the natural beauty of the wood grain and can be used on its own as a clear finish. For exterior doors, our durable finish helps protect the wood from harmful ultraviolet rays while showcasing the natural wood grain pattern.

Custom Thickness Constructions

Go beyond the norm with custom thickness options made possible with our tooling flexibility, manufacturing equipment, and creative team.

Capability to Tightly Adhere to Architectural Specs

Our specialized processes and construction techniques reflect our deep experience across a wide range of species, architectural specifications, and performance requirements.

Custom Profiled Constructions

Get a custom look with personalized requests available outside our five standard sticking options.

Capacity to ensure extraordinary fulfillment

Our 60,000-sq. ft., state-of-the-art manufacturing facility was purpose-built to balance the craft of custom work and the efficiencies of high volume production runs.

Custom Veneer

A full range of domestic and exotic veneer species allow you to explore and discover less traditional wood species for your project.

Our client-friendly order, production, and service environments, combined with an end-to-end focus on quality, have earned us a reputation for doing things right, and doing the right thing.

General, project-specific, and application-specific warranties

We confidently back our products with industry-leading warranties.

General Warranty Information

Interior Aspiro® Series doors come with a warranty for the life of the original installation. All doors are carefully inspected before leaving our plant and our delivery methods ensure that the product reaches the customer in top condition.

For our warranty to be in effect, the following conditions must be met:

1. Interior doors must be sealed and finished to industry standards on all six sides, including under hinges and hardware, either at the factory or in the field.
2. Exterior doors must be factory sealed and finished to industry standards on all six sides, including under hinges and hardware at the factory.
3. Doors must be used in the application they were ordered for i.e. interior doors to be used in dry interior applications.
4. Doors must be handled and installed according to AWI standards.
5. Other limiting conditions may apply. Please contact the factory or your Forte Sales Representative for more information.
