

Odor Removal Services

Remove foul odors from indoor spaces, restoring a neutral scent.

Unpleasant odors originating from fire, smoke, pets, cooking, or cigarettes often pose significant challenges for residential and commercial properties.

When faced with the need to remove these odors at the molecular level, Contractor Connection® presents state-of-the-art deodorization solutions aimed at restoring spaces to a neutral odor state. Whether tackling minor pet odors or addressing the complex aftermath of fire-related incidents involving smoke and fire, our odor removal service offers a viable alternative to harsh chemicals or extensive demolition.

Our approach streamlines the restoration process and provides the highest standing of care:

Safe. State-of-the-art technology harnesses oxygen and humidity in the treatment area to produce the required molecules for odor removal, without relying on harmful chemicals or masking agents.

Fast. Most treatments are completed within a 24-hour timeframe. In cases where only smoke damage is involved, the treatment duration is shortened to 6-12 hours.

Effective. Cutting-edge technology harnesses Oxy Radicals which are highly reactive agents ideal for effective odor removal.

What is the Odor Removal Difference?

Neutralize unpleasant odors caused by:

- Fire smoke
- Tobacco smoke
- Cooking (including grease and hard-to-remove curry odors)
- Flood/Water damage
- Spoiled foods
- Pet Urine and Dead Animal
- Sewage
- Fuel Spills
- Mold & Mildew
- Body Odor
- Fungus

Cost-effective: Furniture, electronics, clothing, linens, wall coverings, and artwork can remain in the residence or on property during treatment, removing the need for expensive packing and moving costs.

Reduce tear-out: Our service effectively remove smoke odors at the source, reducing the need for extensive demolition or multiple coats of paint when dealing with odors from smoke and fire damage.

Rapid treatment times: Residential treatments typically completed within 24 hours or less, while commercial losses may vary depending on cubic footage.

Complimentary Air Quality tests: Air Quality Tests conducted before and after treatment demonstrate the tangible improvement our service provides.
