

Environmental risk consulting

Environmental risks are becoming more complex, visible, and material to insurers, brokers, and businesses

Regulatory change, pollution incidents, environmental liabilities, and growing stakeholder scrutiny can all create significant financial, operational, and reputational consequences.

Crawford Environmental helps clients understand, quantify, and manage environmental risk through a combination of environmental science, insurance expertise, and commercial insight. We support organisations before, during, and after environmental events, helping them make informed decisions, control exposure, and respond with confidence.

Whether supporting underwriting, assessing liabilities, advising on transactions, or responding to incidents, our specialists provide independent, technically robust guidance tailored to client objectives.

The challenges

Environmental exposures rarely sit neatly within one discipline. Organisations must navigate environmental liabilities, regulatory expectations, pollution and biodiversity risks, sustainability considerations, and operational pressures while balancing commercial and reputational concerns. Key challenges can include:

- Understanding environmental liabilities and pollution exposures
- Supporting risk selection and underwriting decisions
- Assessing environmental issues during acquisitions and transactions
- Managing ESG-related risks and stakeholder expectations
- Responding effectively to environmental incidents and claims
- Controlling remediation costs and recovery programs
- Interpreting evolving environmental regulation and compliance

Many organisations need more than technical environmental advice. They need specialists who understand how environmental risks affect insurance, financial and operational outcomes.

Who we can help

Environmental risk affects organisations across multiple sectors and throughout the insurance and risk management process. Our services support:

- Insurers seeking enhanced environmental risk insight
- Brokers requiring specialist technical support
- Corporate risk managers handling environmental exposures
- Businesses undertaking acquisitions, disposals, or investment activity
- Organisations responding to pollution incidents or environmental claims
- Clients requiring independent environmental expertise for strategic decision-making

Whether the objective is preventing loss, improving risk selection, managing liabilities, or supporting recovery, Crawford has the expertise and oversight to help clients navigate environmental risk with confidence.

How clients can benefit

- Environmental science integrated with insurance expertise
- Independent, objective technical advice
- Understanding of insurance and reinsurance markets
- Practical, commercially focused recommendations
- Specialist knowledge of emerging environmental risks
- Access to Crawford's wider expertise and resources
- Global capability delivered through a coordinated approach

We help clients move beyond compliance to better understand risk, exposure, and opportunity.
