

# Using industry expertise to uncover suspicious injuries

## CHALLENGE

A piece of scaffolding struck the leg of a construction employee, causing a laceration that required 100 sutures. After undergoing surgery and physical therapy, the claimant and his counsel requested a settlement of \$3,000,000 for ongoing pain.

## SOLUTION

Broadspire's claims adjuster coordinated surveillance, which showed the employee remaining active and walking without a limp. Using this information, Broadspire achieved a global settlement of \$550,000, resulting in a savings of over \$2.4 million.

### INDUSTRY

Construction

### LOCATION

U.S.A.

### CLAIM TYPE

Workers' compensation

## RESULTS

**\$2.4 M**

savings for our client
