

Power and Energy

Specialized knowledge, skills, and experience supporting power generation, transmission, and utilities.

The energy industry in the United States is undergoing significant changes. As our demand for energy expands exponentially, so does our production through traditional and renewable energy sources.

Modern technologies including artificial intelligence, machine learning, and cryptocurrency mining will continue to require significantly more energy pointing to a future with additional business opportunities.

As you seize these opportunities, you need a partner with the specialized experience and skills to effectively manage these unique claims. With our sophisticated technology, on-the-ground resources, and desk-based experts throughout North America and 70 countries around the world, we are the partner your organization can depend on.

Our industry-knowledgeable specialists have direct experience in all aspects of the energy industry including:

- Onshore and offshore oil and gas extraction
- Crude oil refinement
- Energy infrastructure construction and operation
- High power transmission and storage
- Nuclear power
- Renewable energy including wind, solar, geothermal, and biomass

We provide a wide array of services to effectively support your immediate claim needs and help reduce your risk profile/total cost of risk.

- Loss consulting
- Litigation support
- Subrogation
- Medical management
- Workers' compensation claims management
- Auto liability and general liability claims management
- Environmental claims management
- Property claims management
- CAT events
- Safety consulting
- OSHA recordkeeping services
- Business interruption claims management
- Data analysis and program insights
- Drillable program-to-location dashboards

Beyond what we do is how we do it. From the onset of our partnership, we will work to understand your unique needs to design the perfect program to address your exposures and concerns. From there, we will deliver on our promises while providing program insights to drive continuous improvement.
