

# On-Demand Training Course Catalog

Empower your team with a self-paced training platform that they can access any time, from anywhere. Leverage our full collection of courses designed for all skill levels and industries to develop and enhance your skillset, and achieve your business goals quicker and more efficiently.

## Fundamentals

Designed and developed by technical trainers and Unity experts, these courses are delivered through on-demand, video-based modules that are appropriate for all skill levels. With challenges, hands-on sample projects, and knowledge checks, learners can expect to gain a confident foundational understanding of a new topic.

	<p><b>Build Interactivity with Timeline</b></p> <p>Learn the fundamentals of creating choreographed Timeline interactions in your Unity projects, including how to animate and activate objects, how to work with sound, and how to trigger timelines with a user interface.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Create Animated Stories with Unity</b></p> <p>Learn to create real-time animated cinematic sequences using Timeline and Cinemachine.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 40 hours</p>
	<p><b>Create Compelling Shots with Cinemachine</b></p> <p>Create compelling camera shots using various Cinemachine techniques and camera rigs. Learn how to implement powerful hybrid camera rigs that combine the power of procedural cameras with the precision of key-framed cameras.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 6 hours</p>
	<p><b>Create High-Fidelity Lighting in the High Definition Render Pipeline</b></p> <p>Learn the essential skills of a master Unity lighting designer. Recreate realistically lit scenes with atmosphere, visual drama, and style.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Create Interactions with Visual Scripting</b></p> <p>Learn the foundations of Object-Oriented Programming to create interactions using simple logic, without being a programmer. This course covers the user interface, adding common interactions, and improving and refactoring scripts.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Create Real-Time Visualizations with Unity Reflect and Unity Pro</b></p> <p>Learn how to configure projects for fast iteration with Unity Reflect, and leverage Unity Pro's suite of design tools to create highly realistic design visualizations.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 10 hours</p>
	<p><b>Debug, Optimize, and Manage Projects in Unity **</b></p> <p>This course is designed for those familiar with C# and Unity to explore best practices for producing robust applications in a team setting. Learners are guided through the process of version control as they debug and optimize an example project.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Develop 3D Mobile Games in Unity</b></p> <p>Use Unity's 3D development tools to develop a 3D scavenger hunt game.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 22 hours</p>
	<p><b>Develop Interactive User Interfaces in Unity</b></p> <p>Master user interface (UI) components and learn how to easily create interactive interfaces, add animation, and optimize UI text objects.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Develop Mobile AR Applications with Unity</b></p> <p>Learn to create sophisticated and interactive augmented reality (AR) applications for mobile devices through project-based development.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 25 hours</p>
	<p><b>Develop Real-Time 3D Applications with Unity</b></p> <p>Learn how to utilize real-time 3D development for a range of use cases, including simulation, training and spatial visualization, across industries.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Importing Ax+F and xTex Files into Unity</b></p> <p>This training details the necessary steps for importing xTex and Ax+F data into Unity. You'll be given an overview of the importer installation process and configuration settings and practice bringing in 3D material data in both formats.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 30 minutes</p>
	<p><b>Get Started with 2D Art in Unity*</b></p> <p>This course is designed for artists who are interested in becoming familiar with the Unity Engine. In this course, you will make use of the Sprite and Skinning editors and work with Tilemaps, Palettes and Grids to create engaging User Interfaces.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Get Started with 3D Art in Unity*</b></p> <p>You will develop an engaging scene using prefabs and Unity terrain tools, and be introduced to particle and post-processing effects to enhance the visuals and user experience.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 15 hours</p>
	<p><b>Get Started with C# in Unity**</b></p> <p>This course builds on our Review the Unity Essentials workshop, further developing an understanding of C# programming concepts and features. This course is ideal for developers looking to make the most of C# scripting in Unity.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 11 hours</p>
	<p><b>Get Started with Real-Time 3D Using Forma</b></p> <p>This course is for anyone new to real-time 3D who is interested in learning how to use Unity Forma. It gets you up to speed with Forma modes so you can import your own models, materials, and environments to build an engaging product</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Manage Content with the Addressable Asset System</b></p> <p>Learn the best practices for using addressable assets in a team production environment with complex asset pipelines.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Optimize Memory and Asset Management in Unity</b></p> <p>Explore unique solutions for memory optimization and best practices for asset management in Unity.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Optimize User Interfaces in Unity</b></p> <p>Learn to identify early user interface (UI) problems and create ideal techniques and workflows that allow your team to create optimized UIs.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Optimizing with the Pixyz Plugin</b></p> <p>Get an in-depth look at the fundamentals of the Pixyz Plugin, including configuring various import settings to optimize your CAD model, using the Toolbox to decimate your model, removing meshes, reducing draw calls, and more.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Pixyz Studio Fundamentals</b></p> <p>This course will introduce professionals with CAD experience to Pixyz Studio, step through the workflow of making CAD assets compatible for use in real-time 3D applications, as well as contextualize various aspects of real-time 3D rendering.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 2 hours</p>
	<p><b>Profile and Optimize Android Applications with Android Studio</b></p> <p>Use Android Studio to profile and identify areas for optimization in a sample project. Learn best practices for using specific platform-specific profiling tools.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Profile and Optimize Unity Applications</b></p> <p>Complete several optimization mini challenges before analyzing and optimizing a large-scale scene.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Program Interactions with C# Scripting in Unity**</b></p> <p>This course is designed for those familiar with C# and Unity. After covering Physics, Colliders, and Input methods, this course deep dives into object-oriented programming. Participants will design and create hierarchies, interfaces, and generic types.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 9 hours</p>
	<p><b>Prototype Design Concepts for Mobile Applications</b></p> <p>Learn to quickly prototype interactive design concepts for mobile applications in Unity.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 9 hours</p>
	<p><b>Review the Unity Essentials**</b></p> <p>Learn the fundamental Unity skills required to work with GameObjects and create interactive user interfaces (UIs) by using Unity's canvas-based UI system.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 10 hours</p>
	<p><b>Shader Graph Fundamentals</b></p> <p>Learn the fundamental concepts of shaders, how they work in Unity, and how you create them using Codeless Shader Graph workflows. You will learn to apply textures, work with vertex and fragment shaders, and create various effects on objects.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 9 hours</p>
	<p><b>Unity Floating License Server Fundamentals</b></p> <p>This course equips learners with the skills to install, configure and operate their own Floating License Server. Learners will have a solid understanding of how to set up and administer their own Floating License Server.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 2 hours</p>
	<p><b>Universal Render Pipeline (URP) Lighting Fundamentals</b></p> <p>This course covers Unity's URP and how to configure lighting in a visually stunning and performant way. You'll explore lighting like configuring Asset Settings, Light Probes, Reflection Probes, Baked Lighting, Post-Processing, and Material settings.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 6 hours</p>
	<p><b>XR Interaction Toolkit Fundamentals</b></p> <p>This course introduces professionals to the core concepts of building a VR application with the XR Interaction Toolkit. provides steps to go through building Interactions, and reviews additional developer tools that can help troubleshoot issues.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 3 hours</p>

\* Part of the Unity Certified Associate: Artist Exam  
\*\*Part of the Unity Certified Associate: Programmer Exam

## NEW! Fundamentals Series: Developing for visionOS

Designed and developed by technical trainers and Unity experts, this 8 course learning plan consists of 40 hours of learning, designed for professionals at all skill levels. With challenges, hands-on sample projects, and knowledge checks, learners can expect to gain a confident foundational understanding of developing for visionOS.

	<p><b>Introduction to Developing for visionOS with Unity</b></p> <p>Learn the core concepts of developing visionOS apps with Unity, starting with Vision Pro device modes, how to configure your apps to render in each mode, how to test your app with the Device Simulator in Xcode, and how to build it.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 3 hours</p>
	<p><b>Shader Graph for visionOS Mixed Reality</b></p> <p>Master development of custom shaders for visionOS mixed reality. Create water effects consisting of surface movement, refraction, and caustics; Learn to create custom lighting blended alongside Image Based Lighting provided by visionOS.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 5 hours</p>
	<p><b>Developing visionOS Mixed Reality Applications with Unity</b></p> <p>Learn to configure, build, and deploy mixed reality content for visionOS: Create applications that coexist with other applications in a shared real-world environment, applications that singularly control the entire camera view, and more.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 6 hours</p>
	<p><b>Spatial User Interfaces and User Experience</b></p> <p>Learn to create spatial UI using Unity Polyspatial. Create and interact with UI designed for the Apple Vision Pro's Immersive Mode such as the Polyspatial Apple input pattern, creating custom Inspector windows, and compositional development.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 8 hours</p>
	<p><b>Developing Interactions for visionOS</b></p> <p>Learn how to use Unity's XRI 3.0 package with the supporting sample project. This unique package is geared to help developers make use of the Vision Pro's unique input devices by designing their own custom gestures for interactions.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 5 hours</p>
	<p><b>XR Hands Fundamentals</b></p> <p>Get started with Unity's XR Hands package and supporting sample projects on how to edit and create gestures. You will also design your own custom gesture to work as the input device for an interaction event.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 5 hours</p>
	<p><b>AR Foundation for visionOS</b></p> <p>Get immersed in the concepts and workflows of the AR Foundation package and how to configure your Unity projects to maximize it. Guides learners through each feature supported by AR Foundation and visionOS, as well as implementation.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 4 hours</p>
	<p><b>Unity Input System for visionOS</b></p> <p>The Unity Input System is a comprehensive solution for input handling for visionOS. The enhanced tools for input mapping, processing, and event-driven notification, offer better control to significantly improve experiences for Apple Vision Pro users.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 4 hours</p>

## Concept Courses

Concept courses helps learners familiarize themselves with the principles, parameters, and jargon of a new topic before they start their learning journey.

	<p><b>Addressables</b></p> <p>Discover everything you need to know to get started with Addressables. Learn about the benefits of the Addressable Asset System, how to configure assets, and the ways in which you can use Addressables to scale and improve your games.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 1 hour</p>
	<p><b>Authentication</b></p> <p>From creating seamless user experiences to collecting useful information on user behavior, with Unity Authentication, developers can improve both anonymous user identification and platform-specific authentication.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 30 mins</p>
	<p><b>Cloud Save</b></p> <p>This short course will familiarize you with the concepts of Unity Cloud Save. This feature allows you to save data on a remote server and makes it easier to switch between devices and continue their progress without having to start from scratch.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 30 mins</p>
	<p><b>Data-Oriented Design</b></p> <p>Learn the principles and benefits of Unity's Data-Oriented Tech Stack (DOTS). This modern approach to game development focuses on the optimization of design systems to create efficient, high-performance games.</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 1 hour</p>
	<p><b>DevOps</b></p> <p>This course covers the fundamentals of DevOps, from methodology through to implementation. You will learn how to use DevOps best practices to move to a more streamlined development process aligned with Unity's product offering.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 30 mins</p>
	<p><b>DOTS: Entities, Jobs, and Systems</b></p> <p>Learn how to create and manipulate entities (the basic building blocks of DOTS), how to write and execute jobs (the units of work), and explore systems (responsible for orchestrating the behavior of entities and jobs).</p>	<p><b>Difficulty:</b> Intermediate</p> <p><b>Duration:</b> 1 hour</p>
	<p><b>Prefabs</b></p> <p>In this training, you will learn about the different types of prefabs available, various scenarios in which they can be used, as well as FAQs and common recommendations to help you make the most of prefabs.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 30 mins</p>
	<p><b>Rendering Pipeline</b></p> <p>This training provides an overview of a rendering pipeline, the four rendering pipelines that come with Unity, and recommendations in deciding which pipeline to use for your project.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 15 mins</p>

## Quickstart Courses

Our Quickstart course series consists of short-form, video-based courses intended to quickly and easily introduce new topics.

	<p><b>Unity Cloud: Overview, Managing Organizations, Parsec, and Asset Manager</b></p> <p>Immerse yourself in Unity Cloud's various services and tools, learn how to maintain your projects across different teams and users within your organization with Parsec and Asset Manager.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 75 mins</p>
	<p><b>Unity Muse: Overview</b></p> <p>Explore how Unity Muse can aid creativity and accelerate productivity. The generative AI built within the Editor means prototyping ideas is rapid, intuitive, and seamless for developers, artists, and decision makers alike.</p>	<p><b>Difficulty:</b> Beginner</p> <p><b>Duration:</b> 20 mins</p>

Professional training can help you improve performance, increase productivity, and enhance the quality of your projects. Make sure your team has the tools – and skills – it needs to succeed.
