## Aviat Certified Installer (ACI) Certification – WTM4000 TRN-ACI-TRACK-X

---

### Course Specifics

Duration:	Self-paced e-learning (4-5 hours)
Delivery Format:	eLearning content

### Course Description

The Aviat Certified Installer Certification covers the learning content and assessments focused on developing skills required for installing Aviat equipment. This certification is a specialized track targeted at installers working with Aviat products and builds on the foundational product knowledge provided by the pre-requisite Aviat Networks Associate track.

The ACI track covers courses and additional KB articles relevant to the installation of the latest Aviat WTM4000 platforms. All exams are part of the completion criteria and are included in the learning course. On completion of all courses, the student will be certified as an Aviat Certified Installer (ACI).

### Target Audience

This Learning Plan is intended for individuals requiring knowledge of how to install the Aviat WTM4000 platforms and related radio equipment.

### Prerequisites

- Aviat Network Associate (ANA) Certification.
- PC with Internet access, Internet browser software, and access and subscription to AviatCare LMS

### Objectives

Upon completing this course, participants will be able to:

- Demonstrate knowledge of installation best practices when installing the WTM4000 microwave equipment.
- Demonstrate specialized installation-related skills and knowledge for the WTM4000 platforms.

### Course Outline

Course content is subject to change. Revisions of Certification course content is based on the introduction of new and enhanced products and technologies. The content is per Track purchased.

- Installation Best Practices
- WTM4000 Installation Best Practices
- Certification Exam

### Installation Best Practices

The Installation Best Practices course introduces fundamental topics for microwave installation. The topics include best practices around safety measures and planning steps for preventing hazards. Additionally, best practices related to installing equipment to protect from lightning and harsh weather conditions are covered.

## **WTM4000 Installation Best Practices**

The WTM4000 Installation Best Practices course provides students with an overview of the documentation required to install the WTM4000 all-outdoor radio product.

## **Assessments**

Completing a short assessment at the end of the courses validates the students' knowledge of the information covered in the documentation and a final certification exam that will provide students with the credentials necessary for the Aviat Certified Installer certification level for WTM4000.

## **Compliance**

Upon successfully passing the re-certification exam, the individual is certified for 3 years. To renew, the individual must complete the recertification examination before the current certification expiration date.

## **Pricing & Scheduling**
