FAS SOFTWARE (FAS) Overview E-Learning

TRN-FAS-OVIEW-E

Course Specifics

Duration:	Self-paced e-learning (~1hour)
Delivery Format	eLearning
Materials provided:	NA

Online Training

Course Description

Aviat FAS (Frequency Assurance Software) is a critical cloud-based software tool that simplifies the complexity of link management and troubleshooting, it greatly improves microwave network reliability and performance, and lowers OPEX.

The FAS Configuration and Management course provides full guidance on the configuration, use and administration of the Frequency Assurance Software.

The FAS Overview module presents the basic concepts, licensing, and topology view of Aviat's Provision Plus FAS or Frequency Assurance Software option.

Target Audience

This course is intended for Network Operations Center (NOC) operators and engineers involved in managing microwave networks using the FAS on PV Plus.

Prerequisites

- No technical knowledge prerequisites are needed.
- PC with Internet access, Internet browser software, access and subscription to AviatCare LMS.

Objectives

Upon successfully completing this course, participants will be able to:

- Understand the key concepts of Aviat's Provision Plus FAS option
- Identify the required FAS Licensing based on link calculation and the Licensing for PV to PV+
- Navigate the Frequency Assurance View

Course Outline

Module 1: FAS Overview
- Introducing FAS
- FAS Features
- Impact of Interference
- How FAS Works
- FAS View
- Interface Analysis Workflow

Module 2: FAS Licensing
- FAS Licensing
- FAS Licensing – Link Calculation
- FAS Licensing: PV to PV+

Module 3: Network FAS View

- FAS Dashboard
- FAS Dashboard Panes
