
AVIATCARE EDUCATE PRACTICE LABS

TRN-WTM4K-LAB-A

Specifics

Duration: 1 day

WTM4K Practice Labs Mentored by an Aviat Certified Trainer

AviatCare Educate Practice Labs

Aviat Networks hosts and maintains virtual labs for learners to practice their skills within a safe, live-lab environment. We know how hands on practice provides experience and accelerates skill development. The new AviatCare Educate Practice Labs let you explore fully functional hands-on and troubleshooting lab environments in a 1-day session.

Ready to reserve your AviatCare Educate Practice Lab spot?

Visit our Educate section at our website to register for your 1-day session. Remember, to be eligible for the Practice Labs session, you must have participated in an Aviat product training (installation, commissioning, and maintenance) or have a valid certification (ACOS on the required product). Once registered, you will be able to schedule your Practice Lab session.

An Aviat-certified trainer will be there “in case of trouble” during the all-day session to support and oversee participants when needed. This will not be a training session; you will be on your own for the practice on the equipment.

Availability

Practice Labs are currently available for the listed products and certifications.

- WTM4K / ACOS WTM4K

How to order

Before you order:

Make sure you comply with the prerequisites listed below and allow us two weeks to confirm your eligibility for the lab.

Contact the Aviat training department (aviatcareeducate@aviatnet.com) by providing us with your certification ID or copy of your certificate or the details of the class you have participated in (Date of the class you attend)

Target Audience

- Lab access is intended for individuals who have good experience with the product and want to do more practice on the equipment in a controlled environment.
- People who want to run test configurations.

Prerequisites

- Participants should have completed product training or a Certification.
- Each student must have a laptop with administrative rights to install and the required software provided by Aviat Networks.
- Participants need access to a computer and will be required to install programs for the practice sessions.

Required Equipment for Session participation:

EQUIPMENT	PC
OTHER EQUIPMENT	Internet access. Install the VPN software provided by Aviat. Aviat will provide login and Password at the start of the lab day.

Policy

- Aviat Networks recommends that users install these at least a week before the start date of their session in the event they may need assistance from their IT department.
- Participants will have secure access to Aviat Networks training equipment for the period of the purchased session.
- A 1-day Lab session equals 8 continue hours. Sessions can't not be split.
- session will be limited to 8 participants.
- An Aviat trainer/expert will be available to support participants' exercises.
- Participants will receive email notification with access instructions.
