

MODEL TSK325 TASK MEDIUM CUT-RESISTANT GLOVES

CUT- AND SLASH-RESISTANT PROTECTION

MODEL TSK325 TASK MEDIUM CUT-RESISTANT GLOVES

The Model TSK325 gloves provide law enforcement and military operators with maximum dexterity when handling small objects and firearms, and are cut- and slash-resistant. The lamination method is a preferred manufacturing process for slash-resistant gloves, as it adheres directly to the palm, leaving the best possible dexterity with this level of protection.

Hatch® touchscreen technology is embedded into the materials of all fingertips, which are reinforced for extra protection. Other key features of this model include Hatch's index finger Cut-Ring for trigger control, ensuring no unraveling when tip is removed, and the Ergo-Cut™ Floating Thumb design, allowing the hand to remain in a naturally relaxed position, resulting in greater comfort and improved dexterity.

PATENTED

FEATURES

- Palm is lined with Kevlar® fabric
- Durable synthetic palm with Hatch® touchscreen technology in all fingers
- Soft, lightweight and breathable stretch material on back of hand
