

6281HDA Holster Drop Accessory Instructions

The model 6281HDA is design to be used with Safariland 3 hole pattern holsters. The 6281HDA (Holders Drop Accessory) is design to lower the standard ride by 2" (50mm). As with any new piece of equipment, you should thoroughly familiarize yourself with the change in holster location before use as a duty rig.

Follow these steps to change belt loops:

- Step 1-** First remove weapon from holster before beginning any work. Next, remove the three screws from the back piece assembly from your holster. Save screws, you'll need for reassembly.
- Step 2-** Align the holes on the T-Spacer over the t-nuts on the holster and than align the holes of the 6281HDA over the holes of the T-spacer and hand start each of the three 5/8" screws. Be careful not to cross thread; tighten snugly.

NOTE: Before assembling the 6281HDA to the holster make sure you insert the 3 t-nuts into the 6281HDA.

- Step 3-** Align the back piece you removed on your holster to the 3 t-nuts of the 6281HDA, hand start each of the three screws. Be careful not to cross thread; tighten snugly.

CAUTION: Do not cross thread any screw with the t-nut when assembling, as you could strip the threads and compromise the efficiency and safety of your holster. Use Loc-Tite on all screws during the assembly process (Loc-Tite products should be available at all sporting goods stores, gun stores and major catalog distributors which sell firearms or hardware). **BE SURE TO READ AND UNDERSTAND ALL WARNING, CONSUMER SAFETY INFORMATION AND INSTRUCTIONS WHICH ACCOMPANY YOUR SAFARILAND HOLSTER AND YOUR HANDGUN.**
