

Final Mile

Installation Service - Free Standing Refrigerator

INSTALL COMPLETE –

HDFSIC – Home Delivery Free Standing Install Complete

Uncrate, remove packing materials, unpack interior, supply and connect water line to existing water shut-off valve, purge water line, plug in, level, flush refrigerator water system where applicable, test unit for proper operation, install handle on refrigerator and freezer doors if needed, haul away trash, and haul away old appliance if requested. (Must be like product).

Parts included with the Installation of a Refrigerator: (If not installed, parts are not supplied)

Description

- 7' Nylon braided water line

Services included with the Installation of a Refrigerator:

- Final Mile Services will remove refrigerator and freezer doors, if necessary, to get it into the home.
- Final Mile Services will cover finished floors with a protective material to limit the possibility of property damage.
- Final Mile Services will haul away old unit if customer request, (like product only), or move to another location. Up or down one floor.

Obstacles that could prevent the installation:

- Final Mile Services will only deliver if the person receiving the delivery is 18 years of age or older.
- Final Mile Services will remove only exterior doors (hinge pins) to gain access; we will not remove interior doors, hand rails, banisters, screen doors, or move customers possessions to perform services.
- Final Mile Services will not attempt to connect to any water shut off valves further than 6' away from the appliance
- There must be enough slack in a water line when connected to a refrigerator so it can be pulled out for cleaning or servicing.
- Final Mile Services will not drill any holes thru fixed walls or floors.
- Final Mile Services will not attempt to disconnect or connect a water line in a location unless it is fully lighted and the Delivery Installation Specialist is able to stand up.
- Final Mile Services will not attempt to disconnect or connect to saddle or needle valves, only permanent in line water valves.
- Final Mile Services will not attempt to disconnect or connect any water lines where ceiling tiles or other obstructions impede the valve
- Final Mile Services will not attempt to disconnect or connect any water lines in a basement where the ceiling height is higher than we can safely reach and we have an unobstructed path to the valve location
- All water shut off valves must be operational; the Delivery Installation Specialist reserves the right to determine if the water shut valve is operating correctly.
- Final Mile Services Delivery Installation Specialist reserves the right to refuse to disconnect or connect to any water valve they feel is in an unsafe or inaccessible location.
- Final Mile Services will only turn the water off at the specific valve we attach our water line to, we will not turn off house main water valves
- Final Mile Services will NOT reconnect or reuse any existing waterlines.
- Cabinet opening must be large enough for appliance to be installed. No cabinet modification will be made.
- Old product must be free of any food stuffs or pests

See next page for examples of obstacles that could **Prevent** Installation

Final Mile
