Hi-Matte Display

INCLUDED
UltraSlim Wall Mount

Choose your frame

Put your personal style on display! Transform your living room into an art gallery with the CanvasTV from Hisense. Showcase works of art when your TV isn't in use—you can either choose from our collection of iconic masterpieces or upload your own. See the perfect picture, no matter the ambient lighting, with no glare, thanks to the Hi-Matte Display. Hang your TV flat against the wall like a painting, in part to our UltraSlim Wall Mount. Experience the magic of a screen that senses your presence and saves you energy by only powering on when you're nearby. And you can even match the CanvasTV's frame to the rest of your decor by easily switching it out for one of three sleek designs.

Art Mode
Show off your taste in art when you're not watching your TV. Select a single picture or create a slideshow of paintings that match your mood. You can even share all your favorite photos on the big screen by connecting a USB or snapping a picture of a QR code.

Choose Your Frame
Switch in (and out) the CanvasTV's magnetic frame whenever the mood strikes. Just snap it into place and voila! The CanvasTV comes with the teak frame, but you can also opt for the white or walnut frame, both sold separately.

Hi-Matte Display
Admire your favorite works of art without the glare. A special, low-reflection coating enhances your masterpiece-viewing experience by giving the digital artwork the depth and texture of real paintings.

Multi-Channel Surround Sound
Get in on the action, whether you're watching movies, playing games, or listening to music. 2.0.2 surround sound fills up your room and transports you into the scene.

UltraSlim Wall Mount
Hang your CanvasTV flush against the wall to save space and blend in with your decor. Our innovative, two-part mounting system makes the screen light enough that it's easy to handle and install with the help of another person.

4K QLED
Soak up a world of rich color and detail. 4K QLED with Quantum Dot technology relies on how light is emitted to create purer, more brilliant hues than a regular LED TV. With over a billion color combinations, QLED smart displays are in a class of their own.

144Hz Game Mode PRO
Level up your gaming. The 144Hz Game Mode PRO is designed with the technology you need to get on the leaderboard. With a Variable Refresh Rate of 48Hz to 144Hz, you can beat any opponent that comes your way. AMD FreeSync™ Premium Pro, Auto Low Latency Mode (ALLM) and Low Latency MEMC virtually eliminate screen tearing and controller input lag in your play. And the New Game Bar lets you customize and adjust your gameplay right from your TV with your remote, not just your controller.

Google TV · Works with Apple AirPlay · Works with Apple Home · Chromecast built-in · AI HI-VIEW PRO · 144Hz PRO · FILMMAKER MODE · Dolby VISION·ATMOS
