CARE FOR YOUR NEW SLEEP SET

1. **BODY IMPRESSIONS:** The materials used in this mattress are designed to conform to your body's individual contours. Normal settling of materials is to be expected and is not structural or manufacturing defect.
2. **FOUNDATION:** Do not use a foundation other than a matching one purchased with this mattress. It is the foundation that supports the entire mattress and a structurally inferior foundation can cause the mattress to collapse and voids the warranty.
3. **FRAME SUPPORT:** A centre support is required. Double, Queen and King size sets require the use of a bed frame with a horizontal or vertical metal centre support and leg support.
4. **MOVING:** Do not bend, fold or stand your mattress as internal damage may result. Do not stand or jump on the mattress. It is not built for that kind of weight concentration. By carrying a mattress on its side, it is less likely to get damaged. It should be stored flat. Should your mattress have handles; they are to be used for positioning only. They are not designed for carrying or lifting.

IMPORTANT CARE INSTRUCTIONS

The mattress must be continuously supported by a matching (or equivalent) foundation and used with an appropriate frame with centre and leg support. A bed requires a minimum of 5 cross slats (1" X 4") with 3 concentrated in the centre third for double, queen and king sizes as well as longitudinal central beam with a centre leg support.

HOW TO CARE FOR THE MATTRESS

1. Rotate the mattress every month (as shown below 1.1) for the first 6 months, every 3 months thereafter.
2. Rotate foundation every 3 months.
3. Never bend an innerspring mattress.
4. Never bend a foam mattress more than 30 degrees.
5. Use a quality bed frame. To avoid structural damage and voiding of your warranty, double, queen and king size sets must also be used with a rigid centre support with a leg.
6. Do not get the mattress wet.
7. Use a mattress encasement to keep the mattress clean and healthy.
8. If you purchased a mattress only, it must be supported by an acceptable foundation or bed frame that prevents the mattress from bending/bowing.
9. Do not use an iron or excessive heat on the mattress.
