IMPORTANT SAFEGUARDS

IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS BEFORE USING.

- This product is for household use.

When using electrical products, especially when children are present, basic safety precautions should always be followed, including the following:

DANGER:

To reduce the risk of electrocution:

- Always unplug product after using.
- Do not use while bathing.
- Do not place or store product where it can fall or be pulled into a tub or sink.
- Do not place in or drop the product or external power supply into water or other liquid.
- Do not reach for a product that has fallen into water. Unplug immediately.
- Do not handle the external power supply with wet hands.
- Check the supply cord and external power supply for damage before the first use and during the life of the product.

WARNING:

To reduce the risk of burns, electrocution, fire, or injury to persons:

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Use this product only for its intended use as described in this Instruction Manual or as recommended by your dental professional.
- Never operate this product if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into any liquid. Contact Water Pik, Inc. at 1-800-525-2774 or visit www.waterpik.com.
- Do not plug this device into a voltage system that is different from the voltage system specified on the device or external power supply.
- Keep electrical cord away from heated surfaces.
- When unplugging the external power supply, be sure to pull the power supply itself. Do not pull the cord to unplug.
- Never drop or insert any object into any hose or opening.

- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Remove water flosser reservoir to fill. Fill reservoir with warm water or other dental professional recommended solutions only.
- Only use tips and accessories recommended by Water Pik, Inc. and as identified in this instruction manual.
- The supply cord and external power supply cannot be replaced. If the cord or external power supply are damaged, the appliance must be scrapped.
- Do not use iodine, saline (salt solution), or water insoluble concentrated essential oils in this product. Use of these can reduce product performance and will shorten the life of the product.
- Do not direct water from the water flosser under the tongue, into the ear, nose or other delicate areas. This product is capable of producing pressures that may cause serious damage in these areas.
- Do not direct water into the nose or ear. The potentially deadly amoeba, *Naegleria fowleri*, may be present in some tap water or unchlorinated well water and may be fatal if directed into these areas.
- If your physician or cardiologist has advised you to receive antibiotic premedication before dental procedures, you should consult your dentist and/or medical professional before using the water flosser or any other oral hygiene aid.
- Remove any oral jewelry prior to use of this product.
- Do not use if you have an open wound on your tongue or in your mouth.
- Do not use this product for more than five minutes in each two-hour period.
- If the Pik Pocket™ tip (not included in all models) separates from the shaft for any reason, discard tip and shaft and replace with new Pik Pocket™ tip.
- This product does not contain any user serviceable electrical parts and it does not require maintenance. Do not attempt to open the product.
- This product complies with the safety standards for electromagnetic devices. If you have a pacemaker or other implanted device containing magnets or electronics, contact your physician or the device manufacturer prior to using the appliance.

*Replace Every 3 months **Replace Every 6 months

Replacement tips/attachments may be purchased online at www.waterpik.com or by phone from Water Pik, Inc. at 1-800-525-2774. To find detailed information about tips, other accessories, and product usage please visit our website at www.waterpik.com.

GETTING STARTED

**Powering the Unit**

Plug the external power supply into an electrical outlet. If the outlet is controlled by a wall switch, be sure it is turned on.

Preparing the Reservoir

Lift the reservoir lid, remove the reservoir, and fill with lukewarm water. Replace the reservoir over the base and press down firmly and close the lid.

Inserting and Removing Tips

Insert tip into the center of the water flosser handle, pressing down firmly until the tip clicks into place. The colored ring will be flush with the top of the handle if the tip is correctly locked into place. To remove tip from the handle push the tip eject button on the handle.

Prime Unit (First Time Use Only)

Set pressure control dial on base to high (pressure setting No.10), point the handle and tip into sink. Turn power and water ON until water flows from the tip. Turn unit OFF.

Adjusting the Pressure Setting

Turn the pressure control dial on the base of the unit to the lowest setting (pressure setting No.1) for first-time use. Gradually increase pressure over time to the setting you prefer – or as instructed by your dental professional.

Using the Water Flosser

Always place the tip in your mouth before turning the water ON.

With water switch on handle in OFF position, turn power on.

Lean over sink and slightly close lips enough to prevent splashing while still allowing water to flow from mouth into the sink. Turn water switch ON. When finished, turn water switch and power OFF.

During use you can stop the flow of water by sliding the water switch on handle to the OFF position.

NOTE: Motor will continue to run.

Recommended Technique

For best results, start with back teeth and work toward the front teeth. Direct the stream at a 90-degree angle to your gumline with tip in mouth. Glide tip along gumline and pause briefly between teeth. Continue until you have cleaned the inside and outside of both the upper and lower teeth

Tips: - LOOK INTO SINK, not in mirror, to reduce splashing.

- To avoid mess: Keep tip in mouth while unit is on.

When Finished

Turn the unit off. Empty any liquid left in the reservoir.

NOTE: If you used mouthwash or other solution besides water, see "Using Mouthwash and Other Solutions" section.

NOTE: NOT ALL TIPS INCLUDED WITH ALL MODELS.

TIP USAGE

Pik Pocket™ Tip

The Pik Pocket™ tip is specifically designed to deliver water or anti-bacterial solutions deep into periodontal pockets.

To use the Pik Pocket™ tip, **set the unit to the lowest pressure setting.** Place the soft tip against a tooth at a 45-degree angle and gently place the tip under the gumline, into the pocket.

Orthodontic Tip

To use the orthodontic tip, gently glide tip along gumline, pausing briefly to lightly brush area between teeth and all around orthodontic bracket, before proceeding to the next tooth.

Tongue Cleaner Tip

Set to lowest pressure setting, place tip in the center/middle of your tongue about half way back. Pull forward with light pressure. Increase pressure as you prefer.

Plaque Seeker™ Tip

To use the Plaque Seeker™ tip, place the tip close to the teeth so that the bristles are gently touching the teeth. Gently glide tip along gumline, pausing briefly between teeth to gently brush and allow the water to flow between the teeth.

Implant Denture Tip

The Implant Denture tip is specifically designed to access areas that are unreachable with a Classic Jet tip, Plaque Seeker™ tip, Orthodontic tip, or Pik Pocket™ tip. To use the Implant Denture tip, place the tip on the lingual side at one end of the implant retained denture. The opening of the tip is directed between the natural gum tissue and the denture directing the water under the denture. Slowly glide the tip along the space between the natural gum tissue and the denture until you have cleaned underneath the entire length of the denture.

CLEANING AND TROUBLESHOOTING YOUR WATERPIK™ WATER FLOSSER

Using Mouthwash and Other Solutions

Your Waterpik™ water flosser can be used to deliver mouthwash and antibacterial solutions. After using any special solution, rinse unit to prevent clogging by partially filling reservoir with warm water and running unit with tip pointed into sink until unit is empty.

Cleaning

Before cleaning, unplug from the electrical outlet. Clean the product when necessary by using a soft cloth and mild non-abrasive cleanser. The water reservoir is removable for easy cleaning.

NOTE: Remove reservoir valve by pushing up from bottom of reservoir.

Removing Hard Water Deposits/ General Cleaning

Hard water deposits may build up in your unit, depending on the mineral content of your water. If left unattended, it can hinder performance.

Cleaning internal parts: add 2 tablespoons of white vinegar to a full reservoir of warm water. Point the handle and tip into sink. Turn unit ON and run until reservoir is empty. Rinse by repeating with a full reservoir of clean warm water.

This process should be done every 1 to 3 months to ensure optimal performance.

Leakage

If leaking due to a damaged hose, replacement hoses and handles can be purchased at www.waterpik.com or contact Water Pik Inc. customer service for a self service repair kit.

Service Maintenance

Waterpik™ water flossers have no consumer serviceable electrical items and do not require routine service maintenance. For all parts and accessories go to www.waterpik.com.

You may also call our toll-free customer service number at 1-800-525-277. Refer to the serial and model numbers in all correspondence. These numbers are located on the bottom of your unit. Still have questions? Go to www.waterpik.com.

LIMITED THREE YEAR WARRANTY

Water Pik, Inc. warrants to the original consumer of this new product that it is free from defects in materials and workmanship for 3 years from the date of purchase. Consumer will be required to submit the original purchase receipt as proof of purchase date and if requested, the entire product, to support a warranty claim. Water Pik, Inc. will replace at its discretion the product, which in its opinion is defective, provided the product has not been abused, misused, altered or damaged after purchase, was used according to instructions, and was used only with accessories or consumable parts approved by Water Pik, Inc. This limited warranty excludes accessories or consumable parts such as tips, etc.

This warranty gives you specific legal rights. You may also have other rights that vary, depending on the law in your place of residence.

WATER PIK, INC. DISCLAIMS ALL OTHER EXPRESS OR IMPLIED WARRANTIES TO THE EXTENT PERMITTED BY LAW INCLUDING, BUT NOT LIMITED TO, ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. ALL IMPLIED WARRANTIES ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. SOME STATES MAY NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE MAY NOT APPLY TO YOU.

Limitation of Liability

This limited warranty is your sole remedy against Water Pik, Inc. and it shall not be liable for any damages, whether direct, indirect, incidental, special, consequential, exemplary or otherwise, including but not limited to property damage, arising out of any theory of recovery, including statutory, contract or tort.

Arbitration

BINDING ARBITRATION AND WAIVER OF RIGHT TO ASSERT MATTERS IN COURT AND RIGHT TO JURY TRIAL

By purchasing, installing, or using this product you agree that any controversy or claim arising out of or relating to your purchase, use, modification, installation, or removal of this product shall be settled by binding arbitration. The arbitrator's decision will be final and binding. Judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction over the matter. Further, you agree that you will not have the right to litigate any claim arising out of or in relation to your purchase, use, modification, installation, or removal of this product in any court or to have a jury trial on that claim.

Arbitration of any matters shall be administered by the American Arbitration Association and conducted by one arbitrator in accordance with the consumer arbitration rules of the American Arbitration Association in effect at the time of filing of the demand. The venue for all such arbitrations shall be Colorado and any such arbitration shall be subject to the Federal Arbitration Act and Colorado law.

WAIVER OF RIGHT TO PARTICIPATE IN CLASS ACTIONS OR PURSUE CLAIMS IN A REPRESENTATIVE CAPACITY

Further, by purchasing, installing, or using this product you agree that arbitration must be on an individual basis. This means neither you, nor we, may join or consolidate claims in arbitration by or against other purchasers or users of Water Pik, Inc. products or the general public. Additionally, you may not litigate in court or arbitrate any claims as a representative or member of a class or in a purported representative capacity on behalf of the general public, other purchasers or users of this product, other persons or entities similarly situated, or in a private attorney general capacity.

FCC Statement (USA)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by Water Pik, Inc. could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
