

Wearing and adjusting.

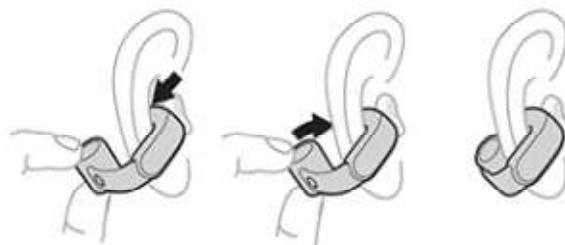

Bose Ultra Open Earbuds

1. Hold the barrel-shaped part of the earbuds so the button is on top and the **R** (right) or **L** (left) marking is facing you.

3. Adjust each earbud so that it sits on your ear at about a 45° angle.

2. Place the rounded end of the L-shaped part in your ear, then wrap the barrel around your ear so the barrel rests behind your ear.

AVOID THE FOLLOWING EXAMPLES OF IMPROPER FIT

The barrel of the earbud should not be in front of your ear and the button must not face downward. Also, the earbud should not be facing downwards or upwards as shown in the last two examples above.
