

RECALL NOTICE

Certain Above-Ground Pools 48-inches and Taller sold in the United States and Canada with Compression Straps on the Outside of the Vertical Support Legs of the Pool

The recalled pools have compression straps that surround the outside of the pool legs that may create a foothold which could allow a child to gain access to the pool and create a potential drowning hazard.

The free repair kit consists of a rope that will maintain the structural integrity of the pool by attaching to each of the vertical pool legs at the ground level (a function previously served by the compression strap).

The recalled pools were sold from 2002 to 2012.

Consumers should contact Intex to receive a free repair kit.
