Nurnberg', and Crassula Argentea

Living Canvas™ Seaside Suntan™ Succulents

- Sempervivum 'String of Pearls'
- Senecio Serpens
- Sedum Nussbaumerianum
- Echeveria 'Perle von Nurnberg'
- Crassula Argentea

Up to 3 in. tall and
3-4 in. wide

FULL SUN TO PART SUN

Planting Instructions

Using a container with drainage holes, fill with soil to within 4 inches from the top. Remove the plant and gently disturb the roots, pruning any damaged ones. Dig a hole and insert the lower part of the root ball, then fill the pot with soil, gently firming the soil around the plant with your fingers.

Water well and adjust the plant position as needed, ensuring it isn't planted too deeply.

Continuing Care

Watering

Water thoroughly until the soil is well-saturated and excess water drains out of the drainage holes. Do not allow the plant to sit in a saucer of water.

Fertilizing

Feed your plants with a water-soluble fertilizer every 2-3 weeks. Discontinue fertilizing by September 1st and resume when new growth appears in the spring.

Winterizing

Succulents should be moved indoors before the first frost. Place them in a room with a sunny window and water them sparingly over the winter.
