

U6
SERIES

AVAILABLE SIZES

100" | 85" | 75"

65" | 55"

Product appearance may vary by screen size.

MiniLED
ULED

The Hisense U6 Series is the access point for serious sports fans like you. It's the ultimate in Mini-LED technology: hyper-real contrasts, bright lighting and rich shadows. This is the kind of TV that drops you right in the action so you can catch all the details—down to every bead of sweat on a player's brow.

Mini-LED: Up to 1000 nits Peak Brightness & Up to 600 Local Dimming Zones

See more contrast on the field and off. Lots of tiny LEDs make a major difference when it comes to the realism of your picture. Think of them like pinpoints of light illuminating your screen. And Full Array Local Dimming creates deeper shadows and brighter highlights, while virtually eliminating halos.

Hi-View AI Engine

Feel like you're in the stands even when you're watching from your couch. Controlled by a high-powered AI chipset, Hi-View AI Engine uses advanced picture processing, like AI 4K Upscaler, AI Smooth Motion and AI Sports Mode to sharpen and boost the quality of whatever's on your TV.

QLED Color

See the exact hue of every blade of grass on the field and every line on the court. QLED Color is made up of quantum dots—very small particles with the ability to display over a billion shades of color. This feature renders every frame with rich, vibrant and realistic color, ensuring that even the most minute details stand out.

AI 4K Upscaler

Stream your favorite live sports with striking clarity. AI 4K Upscaler uses machine learning models to enhance low-resolution content to near 4K quality. Watch beloved movies, home videos and TV broadcasts with sharper edges, more detailed textures and improved visual quality.

Native 144Hz Panel & 144Hz Game Mode Pro

Unlock the next level in gaming! 144Hz Game Mode Pro has a Variable Refresh Rate of 48Hz to 144Hz for a smooth, lag-free playing experience. This feature feels like an extra life, whether your game of choice is action, adventure, role-playing, multi-player or strategy.

Dolby Vision • Atmos & Built-in Subwoofer

Never miss a minute of the action—from your couch. Dolby Atmos, the next evolution of surround sound, creates a moving and immersive audio experience, for every call of the ref and cheer of the fans. And Dolby Vision, with more flare and more depth, enhancing the detail of the picture, down to each shadow cast on the field.

Total HDR Solution

See every basket and goal in all its glory. Total HDR Solution distinguishes between the colors you perceive on screen. That means ink-black blacks, not muddled tones and brighter, more vibrant colors with every HDR format, including Dolby Vision IQ, HDR 10+Adaptive, HDR 10 and HLG.

Fire TV

Get right to the good stuff. Fire TV puts your favorite apps front and center on one main home screen. So you can quickly find shows, movies, and live TV you love without the endless scrolling.
