

## THE CHARACTER OF TREES

---

Like people, each tree has a different character. Nature molds the tree with differences in color and grain, differences that create the beauty and interest found in fine woods. These differences in character make each piece of furniture unique. We hope you appreciate and enjoy the beauty and character of your purchase.

## SOLID WOOD FURNITURE

---

Congratulations on purchasing this handcrafted solid wood furniture product. Please keep in mind that wood is sensitive to changes in humidity. As the weather changes so does the relative humidity in your home and the moisture content of your solid wood furniture.

We have taken every precaution to stabilize the lumber used to build this product. Still, you may observe plank movement or small cracks as the seasons change, particularly during the first 6-12 months of ownership. This is normal for solid wood furniture and will not affect the performance or longevity of this product.

## FURNITURE CARE AND CLEANING

---

Our difference means furniture that is constructed for strength, durability and attention to detail. Basic care for your furniture should protect your investment for years to come.

**CONCRETE:** Clean with a slightly damp cloth and dry immediately with a lint-free cloth. Never use abrasive or acidic cleaning products.

Use coasters and placemats to help prevent marking and stains; clean up spills as soon as possible. Do not cut directly or place hot pans on the concrete top to avoid damaging the sealer.

We recommend re-waxing the table surface every 3 to 6 months depending on use, with a paraffin-based stone floor wax. Additionally, resealing becomes necessary when highs and lows in the sheen of your table top become visible. This basic care will ensure the longevity of your purchase.

**WOOD:** Dust frequently with a clean, damp, lint-free cloth. Frequent dusting will remove abrasive build-up which can damage a finish over time. Occasionally use a light application of a high-quality furniture polish to enhance the beauty of the finish. Avoid using oily polishes or waxes. Avoid exposing your furniture to strong sunlight. Prolonged exposure to direct sunlight can fade the finish of your furniture.

Do not expose your furniture to any liquids. Never allow water to sit on your furniture. Alcohol, nail polish and perfume are also dangerous, as they can dissolve the furniture finish on contact and may require professional repairs.
