

# calmat® Do-It-Yourself installation

**calmat® is installed within a few minutes:  
No tools required – No need to cut the piping system**

- |          |   |
|----------|---|
| <b>1</b> | Attach calmat® to the pipe              |
| <b>2</b> | Wind the impulse cables around the pipe |
| <b>3</b> | Connect the plug to the power supply    |

Once installed, calmat® operates absolutely maintenance-free

# calmat® The scale problem

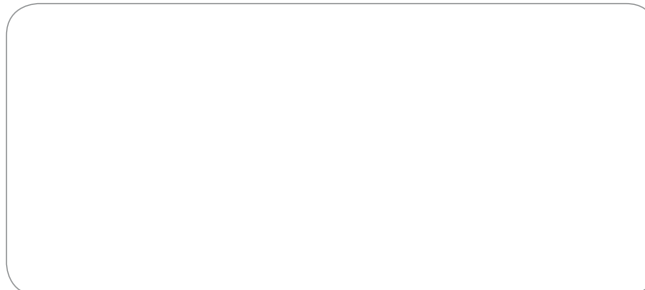

## Hard water and its effects on your house

Scale deposits on the inside of pipes, on heating elements or on household appliances create many typical problems such as:

- ✗ Decreased water pressure
- ✗ Loss of energy in the hot water circuit
- ✗ Dull surfaces in kitchen and bathrooms
- ✗ Repeated repairs or replacement of household appliances or - in the worst case - replacement of your whole piping system

Get your solution against scale and rust today!

# calmat® Against scale and rust

## The **eco-friendly** solution for better water in your home

## calmat® The eco-friendly solution

- ▶ **Protects your whole piping system, appliances and equipment against limescale and rust**
- ▶ **Suitable for all pipe materials: iron, copper, plastic, PVC, compound pipes etc.**
- ▶ **calmat® - max. 1 1/2" pipe**
- ▶ **calmat® PLUS - max. 3" pipe**

Eco-friendly - no salt or chemicals needed	
Maintenance-free	
Developed and manufactured in Germany	
3 year international warranty	
Low electricity costs (approx. 3 €/year)	
High-quality product	

## calmat® The 3 calmat® effects

### 1 calmat® stops scaling on surfaces

calmat® modifies the crystallization of the calcium so that it cannot connect to surfaces anymore and is washed away with the water as a fine powder.

### 2 calmat® gently reduces existing build-up

calmat® carefully resolves already existing build-up in the piping system. Only a thin protective layer remains on the inside of the pipe.

### 3 calmat® protects against rust and corrosion

calmat® generates a controlled electrophoresis process which produces a protective metal-carbonate layer. This layer protects against rust and corrosion.

## calmat® Your benefits

- ✓ Gentle reduction of scale deposits in the whole piping system
- ✓ Less time and money spent on repairs and maintenance in your home
- ✓ Important minerals such as calcium and magnesium remain in the water
- ✓ Considerable savings in washing and cleaning agents
- ✓ Faster cleaning of kitchen and bathrooms
- ✓ Water pressure will be restored
- ✓ High efficiency for your heating and hot water system
